# Rios Montt holds out against Guatemala coup

The Guatemalan armed forces said yesterday they had ousted President Rios Montt, but a senior official said the President was holding out at his palace

surrounded by loyal troops.

The official a presidential spokesman, said General Rios Montt was refusing to hand over power to General Oscar Humberto Mejia Victores, the Defence Minister, who was named President in a military proclamation issued yesterday.

Negotiations were under way as helicopters flew over the presidential palace, the spokes-

Shooting was heard from the palace shortly after the proclamation but there were no immediate reports of casualties. Earlier, phone lines had been cut in the city as soldiers with machine-guns took up positions at the presidential palace and

radio station and air force jets swooped overhead. The proclamation said the military had taken action after "analysing the situation created by a small group who, through personal ambition, attempted to

perpetuate their rule." General Rios Monts, aged 57, a fundamentalist protestant, became President in June last year after heading a group of young officers who deposed the right-wing President Romeo Lucas Carcia in a bloodless

### door' for Labour defectors By Philip Webster Political Reporter

No 'open

The Social Democratic Party is to adopt a generous attitude to any MPs defecting in future from the Labour Party but there will be no "open door" policy for them to join the SDP, it emerged yesterday.

Although Dr David Owen, the SDP leader, is understood to be highly scentical about the

be highly sceptical about the possibility of a large grouping of moderate MPs leaving Labour after the autumn election of its new leader and deputy leader. he is anxious that his own MPs should not adopt a holier-thanthou posture towards their former colleagues.

It is clear however, that the considering applications in future from any disenchanted Labour members.

Mr Ian Wrigglesworth, SDP MP for Stockton, South, said yesterday: "There are number of MPs still in the Labour Party whom of course we would welcome with open arms, but it is essential that we do not give the appearance of being a receptacle for failed and bank-

rupt politicians. All the Labour MPs who fought the last election did so on a very different manifesto to the one on which I and other MPs who left Labour during the last Parliament fought the election under Jim Callaghan's eadership in 1979.

"There are some Labour MPs who would be an asset to us; other would be a distinct liability.

Mr Wrigglesworth said that the situation had changed completely from the days when the SDP was established and it was easier to accommodate defectors. Now there were area parties set up all over the country, allocation of seats had been agreed with the Liberals. and party workers would not take kindly to Labour MPs "trying to jump on the raft" at

this stage.

He said the idea of some Labour MPs forming a breakaway group, perhaps to be called the Democratic Labour Party, was "a sad joke".

It was made clear yesterday that any Labour MP planning to leave their party will be told that if they wish to join the SDP they should establish good relations with their own local SDP area party to have any chance of being selected as an SDP candidate in future.

MPs planning to leave Labour but to stand as independents will be told that they would be opposed by an Alliance candidate.

The future of the Alliance will be debated by the Council month, when conflicting views about the desirability of a merger with the Liberals are bound to be aired.

Although Dr Owen has ruled out the idea of a merger, at least Continued on back page, col 6

### **Americans** too fast Falklands contract for US firm for Wells

By Our Sports Staff

Allan Wells narrowly failed to win Britain's first medal at the world athletics championships in Helsinki when he finished fourth behind three yesterday.

Carl Lewis took the gold medal in 10.07sec. The world record holder, Calvin Smith, was second in 10.21sec and Emmit King third in 10.24sex Wells, who won the gold medal in the Moscow Olympics. which the Americans boycottee was by no means disgraced with a time of 10.27sec.

In the women's final, a torn hamstring spoiled Evelyn Ash-ford's chances of emulating her male American colleagues. Marlies Gochr of East Germany won in 10.97sec, ahead of her compatriot Marita Koch, Miss Ashford's injury forced her to pull out after 60 metres. The British heptathlete, Judy

Livermore, led the field yesterday after three of the seven events. But with her weaker events to come today she will do well to finish in the first six. She ran within one hundredth of a second of her best in the 100 metres hurdles and then followed up with a personal best and the best by anyone in a heptathion - when she cleared 1.92 metres in the high jump.

In the 800 metres, Peter Elliott, Britain's main hope in the absence of Sebastian Coe, reached the final as one of the fastest losers with a time of lmin 45.38sec. "When I came here I just wanted to make the semi-finals and when I saw the semi-final line-up I didn't expect to make the final," he said."Whatever happens now, I know I am one of the best eight in the world."

# Rap on knuckles for Soviet shirkers

The consortium says of the airport: the consortium has trailers - Ford.

From Richard Owen

Vir Sterling: In tune with

government views.

The Soviet Government's new drive for work discipline has been greeted with grumbles and some apprehension at a time when most Russians are on holiday and trying not to think of production quotas.

Under the new regulations, published in all Soviet papers on Sunday and widely discussed yesterday, workers found guilty of persistent absenteeism, poor work performance or - most commonly -drunkenness will be given

loss bits home, shirkers will not be allowed to resign and seek higher-paid work for three moonths.

In some cases (at the drunkards may not even be given the option of a drop in income but dismissed on the spot. When they do find new work, idlers and slackers will normally only be entitled to

their new jobs. If it can be proved that their behaviour has led to a loss of production, miscreauts will be obliged to pay a proportion of the estimated loss out of their

drunkards the entire amount). Absenteeism is to be pun-ished by a cut in holiday entitlement (one day of holiday for every work day lost) and those absent from their work-place without reasonable cause for more then three hours will be considered absent for the

President Andropov landched a campaign against slacking shortly after taking power, but the campaign had recently lost momentum. Some empt to enforce discipline through dracenian measures.

Others seem to hope that a renewed display of zeal by factory managers after the holiday will be followed by more traditional tolerance of idieness, inefficiency and fondness for the vodka bottle. The new measures, which also include rewards for the

sober) are to be enforced by the "work collectives" established under 2 law passed in June. Pravda said yesterday that the collectives would use group discussion and self-criticism to ensure that socialist discipline was seen as a long-term goal rather than a temporary one.

diligent and efficient (and

### Paper plant reopened by new owners

The second secon

A newsprint plant which was closed by the Bowater Corporation three years ago began production under new management last night, bringing the promise of some relief to the Merseyside region's critically high unemployment (Ronald Faux writes).

Consolidated Bathurst. of Canada, the new owners of the plant at Ellesmere Port, have invested £40m in automatic equipment and expect that when production reaches a target of 520,000 tonnes a year, 450 workers will be employed directly with more jobs generated indirectly through trans-

port and maintenance contracts. The company has reached agreement for the print union Sogat 82 to be the sole union representing the workforce. It has declined to discuss recog-nition of the Electrical, Electronics. Telecommunication and Plumbing Union, the Transport and General Workers' Union and the Amalgamated Union of Engineering Workers, which have all made approaches to the company. Dr James Jarvis, employee relations manager, said yesterday that recognition of one appropriate union was now the accepted and most efficient

course throughout industry. Consolidated Bathurst clearly wishes to avoid the earlier troubled position at the plant when nine unions held recognition agreements.

### **Tougher Press** Council urged

Mr John Heddle. Conserva-tive MP for Mid-Staffordshire. is to press for laws to strengthen the powers of the Press Council after its censure of The Sun for publishing a fabricated interview with a Falklands war

Mr Heddle said yesterday he was writing to the Prime Minister to urge government backing for a private member's bill aimed at giving the council "regulatory teeth". The coun-cil's criticism amounted to no more than a rap across the newpaper's wrist," he said.

### Model cannon injures boy

Jeffery Teasdale, aged 16. of Mackenzie Crescent, Burneross, near Sheffield, was injured yesterday by a six-inch replica naval cannon made in his school metalwork shop.
With three friends he went to

local woods and tried to fire it. The gunpowder exploded and the gun leapt in the air, breaking his jaw. His father, Mr Anthony Teasdale, said: "I think he has learnt a hard lesson, I don't think he realized just how dangerous this was."

### Smoking ban opposed

A survey in Edinburgh has shown people to be against banning smoking on buses. About 65 per cent of regular bus users interviewed by Forest, the Freedom Organization for the Right to Enjoy Smoking Tobacco said the present system - smokers upstairs, non-smokers downstairs, should stay. Edinburgh councillors are to vote next Monday on whether or not to ban smoking on the city's buses.

### MP improves

Mr John Blackburn, aged 49. Conservative MP for Dudley West, was said to be making satisfactory progress in hospital

yesterday. He was taken to the Royal Hospital, Wolverhampton, last Wednesday after a sever heart

# Disabled face overtime ban threat by social workers

By Pat Healy, Social Services Correspondent

disabled are likely to be thrown into chaos next month when industrial action by residential social workers is expected to

A ballot of the 25,000 workers who belong to the National and Local Government Officers' Association (Nalgo) is expected to agree an overtime ban in support of a demand for parity with other local government workers.

The ballot, which closes on September 1, is also asking for a ban on admissions to homes, which would force councils to place people in need of residen-tial care in private or voluntary homes, often at a higher cost.

Nearly seven out of ten residential social workers be-long to Nalgo, and their frustration at the lack of progress in achieving similar conditions to those of field social workers is expected to result in a vote for an overtime

That will stretch beyond the limit the capacity of many homes to provide 24-hour care for residents; many depend on the willingness of staff to work more than the basic 39-hour

If the call for an admissions ban is also carried, local authorities will be left with a statutory duty to provide residential homes for vulnerable children, elderly, or handi-

demand."

Unions representing staff in service duties the diplomatic service have parents, whether they liked it or adovcated improvements in the system under which the private system of free education in school fees of their children are Britain. The allowance was not paid in whole or in part by the a "profligate handout" to high Government's boarding school

A memorandum from the Foreign and Commonwealth Office to the Commons foreign affairs committee published yesterday, disclosed that fewer than I per cent of the children whose parents receive the allowance go to local authority boarding schools.

The unions, in their memorandum, called for an end to the grossing up system under which the allowance paid to officers in Britain is set at a higher figure to offset the extra income tax they are required to pay on it. The system, they day, is inequitable because it means that the officer is placed in an artifically higher tax bracket.

They also urge the removal of the contribution by the parents to the cost of one of three return journeys by a child to join them for holidays, which they say penalizes staff in distant posts. They propose that the allow-ance rate for girls' education should be set at the same rate as boys'. "We hope that the committee will favour the removal of this minor legacy of the days of sexual inequality."

A list of schools showed

Windlesham House School to be the most popular, with 35 children of diplomats being educated there, followed by Bedales School (29), Ashford (28), Wellingborough (27), Royal Russell School (26) and Eton (25)

In another memorandum, the union side of the diplomatic service Whitley Council, which constitutes the Civil Service Union, Society of Civil and Public Servants, Civil and Public Services Association, Diplomatic Service Association and the Institution of Pro-fessional Civil Servants, said that parents did not see the allowance as a privilege but as the only practical way the Government could fulfil its obligation to match the education offered to children in this

### Tory gifts curb 'just a sop'

By Philip Webster Political Reporter

Labour Party, Mr David Hughes, Labour's national agent, said yesterday.

He was dismissing as "a sop"

suggestions that the Government might be considering changes in the law to define the right of companies to give money to political parties.

The idea of regulating the

way firms contribute to Conservative Party funds has been put forward by some MPs as a way of deflecting charges of unfair treatment if the Government acts against the trade union levy.

But it emerged yesterday that no firm plans have yet been considered by ministers and the issue has not been formally discussed between Mr Norman Tebbit, Secretary of State for Employment, and Mr Cecil Parkinson, Secretary of State for Industry, responsible respect-ively for the union and com-

# Police trace car sold by doctor a week after his wife disappeared

By Stewart Tendler, Crime Reporter

Essex police yesterday began a detailed forensic examination of a car sold by Dr Robert Jones, whose wife disappeared last month prompting a big. investigation.

Mrs Diane Jones, aged 35, vanished from the family home on the outskirts of the village of Coggeshall near Colchester on July 23 but her husband did not report the disappearance for nine days.

During the weekend in lengthy interviews with police the doctor was asked about a blue Peugeot estate car He said he had sold it but could not give many details.

The car was advertised for sale on July 21 and sold on July It was traced yesterday by the

police to its new owner in Essex after an appeal on local radio.
Forensic science experts
began examining it after completing a short but detailed search of parts of the family home, a converted eighteenthcentury farmhouse, yesterday. They could be seen working in an upstairs room for part of the day as the doctor tried to continue his normal day-to-day

But before going to his surgery he left a press statement. stuck on his kitchen window in which he said he had tried to assist the police at every stage and had agreed to the forensic

### Film-makers claim Nessie sightings

A team from the United States, which has been monitoring the surface of Loch Ness with a video camera for the past week, believes it may have seen the monster on two occasions.

The first claimed sighting was towards the eastern end of the loch. The team says it saw an object about 15ft to 20ft long, crossing the waves and raising its "head" out of the water. The second, from a point over Urquhart Bay, much farther along the loch, was of an object about 30ft-long moving about three feet below the surface.

The team of two, from the National Crypto Zoological Society and led by Erik Beckjord, a wildlife photograoher, has been scanning the surface from points along the shore with a camera capable of filming for 240 hours without a

### Woman in trousers loses claim to job

By a Staff Reporter

A woman who was dismissed from a crematorium after wearing a trouser suit to work bad her claim for unfair dismissal rejected by an industrial tribunal in London yesterday and was ordered to pay £75

Mrs Jeanne Turnock, agad 40, was dismissed from her job as assistant memorial counsellor at Golders Green crematorium, north London, in March this year, after three written and two oral warnings about wearing trousers, the tribunal was told.

Mrs Turnock, of Rotherwick Road, Golders Green, started work at the crematorium in October, 1980, and started to wear a trouser suit during a cold spell at the end of

February this year.
Her job included taking members of the public to inspect memorials in the grounds of the crematorium and she sometimes found herself ankle deep in mud, she told the tribunal. Mrs Turnock, who was

wearing the navy blue trouser suit which caused the argument, told the tribunal that she had specially bought the "lady's buisness trouser suit" after she had been off sick. She had ignored instructions not to wear it because she considered it appropriate.
Mr Frank Carey, managing

director of the crematorium. said that most staff were aware of what was appropriate dress, although there was no specific

Mr Carey said that although he had no personal objection to women in trousers, he thought they were inappropriate for women working in crematoria. "We are dealing with elderly people recently bereaved and a large number may find some offence in a lady in trousers coming to deal with them", he Questioned on what else he

considered inappropriate dress for employees, he listed miniskirts, see-through blouses, plunging necklines, teeshirts with slogans and men wearing sweaters or earrings. Mr John Phillips, an attend-

ant at Golders Green Crema-torium between 1971 and 1978 and a former shop steward there, said that he had seen two women employed there wearing trousers on several occasions and that there had never been Mr David Coates, an official

of the Furniture. Timber and Allied Trades Union, said that particular kind of clothin The tribunal unanimously

decided that the dismissal was Centre at Colindale, London, is fair and that Mrs Turnock had persistently refused to carry out a reasonable instruction.

### Across the academic divide: 2

# A touch of Brideshead but no pomposity

In a second article on an exchange between Malvern, the public school, and a Wolverhampton comprehensive, Lucy Hodges, Education Correspondeni, examines how the state school boys saw their public school contemporaries.

In the same way as the Malvernians thought the state school boys would be yobs, the students from St Peter's Collegiate School, Wolverhampton, thought the public school boys would be snooty and possibly homosexual. Their views of such schools were gleaned from Brideshead Revisited and books like Tom Brown's Schooldays.

I expected the pupils to be far more reserved than they actually are and i expected many of them to be very snobbish", Martin Ward, a St Peter's lower sixth former, said. "I expected the meals to be

poor and a general atmosphere of duliness to be present. I expected great emphasis to be placed on certain established subjects, and very rigid teachers centre. to be present."

Instead, he found the food to be surprisingly good and the other boys to be friendly. "The likes and dislikes and general attitudes of the sixth-form boys were very similar to mine, which I did not expect to find in

a public school", he added. The St Peter's boys agreed that the public schoolboys were talked posh"). Martin Lee, if you are coming out, or and I think I could do a lot

another of the St Peter's sixth-formers, commented: "The school is rather ostentatious, resembling Brideshead, but the manner of the place is in no way pompous. It was a great time, or as great a time as a school can be." Praise indeed. Jan de Vry expected Malvern

to be much more strict and disciplined than it was. "I had heard rumours of the working hours and thought they would be very uncomfortable to live something. Everything was more

relaxed but not slack. The teachers and house masters were very friendly and made most lessons quite interesting. especially the ones I find very boring at St Peter's." Not surprisingly, the state

schoolboys were a great deal more impressed with Malvern than the Malvernians were with St Peter's. There is no denying the superior facilities at Malvern: a large and well-stocked library, a wide range of sports and a spectacular, modern art

can enjoy working. The library, atmosphere, with easy chairs for reading and private tables to WORK AL "When it comes to working hours everyone is the same and

there are no distractions from

"The facilities are a lot better", Jan de Vry said. "With places like the library, people for instance, has a relaxing

television programmes to more work than I am at St watch. At Malvern it is decided Peter's", Jan de Vry said. "The television it is the same for every one."

taneously is a benefit as sport is there." everyone knows they have to They were fascinated by the work, and everyone knows they elaborate prefect system, which aren't missing out on what their carries with it a bizarre lot of friend is doing. # atrocities discounted From Stephen Taylor Harare

**Dossier** on

Zimbabwe Government's sensitivity over the Western press and the Matabeleland situation has been revived by a number of recent reports and in particular the claims of a priest.

Father Hebron Wilson, formerly based in the Tsholotsho district of Matabeleland and a member of the Catholic Commission for Justice and Peace in Zimbabwe, has compiled a dossier on military atrocities against civilians in the province since the Fifth Brigade was deployed there in January to curb growing guerrilla activity. He says that although there has been a decline in the killings since the widespread massacres in February, there have been three serious incidents recently in which about 50 people have

The incidents are all said to have taken place in the Tsholotsho district and in one case involved 20 people being herded into a hut which was

then set on fire. Soon after Father Wilson started making his claims it became known that the Fifth Brigade, the Praetorian Guard drawn almost exclusively from the ruling Zanu (PF) Party, was being withdrawn from Matabeleland. It has been replaced by the Second Brigade, a more

experienced and integrated unit. The Catholic Commission for Justice and Peace has re comment on Father Wilson's allegations and says it is unable to substantiate them. A spokes man said: "He is a respected member of the commission but

The commission, which was a leading critic of military excesses committed by the Rhodesian security forces during the guerrilla war, came into conflict with the Zimbabwe government for the first time earlier this year when it became the first independent body to support press claims about the Matabeleland massacres.

The Government has dis missed Father Wilson's claims by suggesting that the deaths are the responsibility of anti-Government guerrillas and

bandits in the region.

He is in no doubt that the Fifth Brigade is responsible. He says he has spent months compiling his report and has only decided to speak about his findings because he has been unable to get any response from the Government.

# Dark days for 'sleazy dives'

# Kremlin stifles pop music explosion

From Richard Owen

Sergei is young, tousle-haired, wears a leather jacket and carries a briefcase, more like a sociology lecturer than a man who manages several pop groups in Moscow and the provinces. A year ago, Sergei was riding the crest of a wave, putting on pop concerts for wildly enthusiastic audiences of Russian youngsters. Today, he is downcast, and fears for his job as a concert hall director. The turning point was the Party's Central Committee plenum in June, at which Mr Konstantin Chernenko made a tough speech signalling = determined Kremlin crackdown

on uporthodoxy in the arts. Mr Chernenko, who is 71, had been out of the limelight since losing the party leader-ship to Mr Ynri Andropov last November, and he used the ideological campaign as a vehicle for regaining influence. He called on party officials to enforce strict Marxist orthodoxy in the arts, and in language which recalled Stalinist socialist realism inveighed against "alien" Western in-fluences.

would be content with tough words, but the plenum has been followed by tough action. Pop-music, lambasted by Mr Chernenko, is an obvious target, since in the authorities' eyes it undermines their att-empt to stoukd Soviet youth. A number of popular rock groups have been disbanded or barred from performing, including Time Machine and Cruise.

Russian pop music is sophisfrom "heavy metal" to jazz-rock. But the Kremlin's wrath has even fallen on more innocuous, middle-of-the-road bands such as the Happy Kids (Vespolye Rebyata), who used to have a zany pop show on

Soviet Television.
Senior cultural officials recently wrote in the newspaper Sovietskaye Kulture that the group had performed songs of "dubious ideological content". The officials – who included the Deputy Minister of Culture – warned a number of groups that they would be broken up by October 1 if they had not repented of the "lack of discipline" in their work and replaced it with "an adequately high ideological and artistic

level". Rock groups were damaging the moral and aesthetic education of working people, especially the young, the paper added. "It's a disaster", Sergei said

as we walked to a concert by one of his remaining rock groups. On the wall of a building near by a fading poster flapped in the breeze, advertising a concert earlier this year by a group called - appropri-ately enough - Last Chance. "It takes years for a group to

form an identity, and for different types of modern music to develop. Now they want to turn the clock back. Some rock groups, such as Magnetic Band from Estonia, or Moscow's Dialogue, continue to function sporadically, and many of their young fans believe the current caltural

"Our leaders are trying to defend the fortress against us," one sudent said, "but it is too late, we are already inside." Moscow intellectuals agree that process has gone too far, that the authorities are fighting a losing battle against Western influences. The younger generation has

chill will pass.

been formed by influences -including rock music -- which
men of Mr Chernenko's generation cannot begin to understand," one writer commented. The rearguard action is none the less being fought with all the resources of the state

apparatus. A number of discotheques have been closed in Moscow, and dancing has been banned in some of the capital's more popular clubs. The conservative weekly magazine Ogonyok recently complained that clubs and discos were "aleazy dives" where the music was Western and the signs were all in English. "It is time the Komsomol did something about it" the magazine demanded.

Outside the concert hall, cope had scrawled in large, defiant letters "Dark side of the Moon," the title of an album by the British rock group Pink Floyd. Inside, the youngsters were listening restlessly to a middle of the road singer, and calling for the main attraction — a rock group. "I may be wrong." Screet said may be wrong," Sergel said, "but as far as pop masic goes I think we'll be looking at the dark side of the moon for some

Post-Falklands Argentina: Part 2

# Split on relations with Britain

In the second of two articles on Argentine thinking on the Falklands, ANDREW THOM-PSON, our Buenos Aires correspondent, reports politicains' views on the furture of nego-

There is divided counsel among Argentina's politicians over whether the country should sign a formal cessation of hostilities with Britain. No hostilities: the argument is over the best way to advance the diplomatic claim to sovereignty over the Falklands. Senor Oscar Camilion, a

former foreign minister and now one of the key foreign policy specialists in the Movement for Integration and Development, a small but influential political party, is decidedly in favour of signing a formal cessation of hostilities. The hostilities have ended and we should recognize it, he says arguing that in the absence of a formal treaty the British Government can justify its "Fortress Falklands" policy. While members of the Argentine Government believe that a high level of British expenditure on the island will become increasingly unpopular with the taxpayers, Senor Camilion draws the opposite conclusion. Whenever you spend a large amount of money in one place, you create vested interest", he comments. "We should support anything which reduces, rather than increases the number or British troops on the Malvinas (Falklands).\*

A similar, although slightly

Señor Camilion: 'Fortress Falklands' justified

Senor Leopoldo Tettamanti of the Peronists. He would like to see an Argentine decision to sign a formal cessation of hostilities linked to British troop withdrawals and promise to negotiate the future

of the islands. Like other politicians, Señor Tettamanti rejects the argument that the Falkland Islanders have a right to self-determination. He says the islanders are "a sector of the British people, living on land which is not their own". A of the United Nations. "This

Señor Tettamanti visualizes an interim United Nations administration during nego-tiations and to supervise the transition. His ideas are not entirely shared by other leading Peronists, who tend to argue that Britain should make the first move towards a thaw in relations.

"That resolution recognized that hostilities had ended, and called for peaceful negotiations on the sovereignty dispute. Peaceful negotiations mean peaceful negotiations: that is what we want," she said.

Señora Elsa Kelly of the Radicals is sceptical about the need for a formal cessation of hostilities. She fears that Britain is seeking such a declaration as a way of closing the whole sovereignty debate. She argues that if Britain is

really interested in peace in the South Atlantic, it should have accepted Resolution 37/9 of the United Nations General Assembly, voted last November.

Diplomats in Buenos Aires agree that the advent of a civilian government will change the current deadlock between Britain and Argentina.

"I don't think anything will future Argentine Government change immediately", one said, would have to invite Britain to "because no one is sure of the negotiate within the framework stability of the next civilian negotiation will have to be on able to consolidate its position the basis of a recognition of internally, I expect it to launch Argentine sovereignty and of a major diplomatic initiative the legal security of the over the Falklands around this islanders, whose customs and time next year. We might see future must be guaranteed", he some movement then."

Mr Beltran, aged 50, has been in detention since last \ugust, He has 10 children and his family is in serious financial difficulties.

Mr Beltran began his working life as a taxi driver. From 1959 to 1963 he served as president of the Amalgamated laxi Drivers of the Philippines, then rose through the ranks, first of the Philippine Workers' Congress, and later of the Confederation of the

On May Day, 1980, in defiance of martial law regulations, the Kilnsang Mayo (no was founded at a raily of 20,000.

When martial law was lifted in January, 1981, shortly before the Pope's arrival in the Philippines, the organization stepped up its demands for the restoration of werkers' rights.

Trade union militancy in-creased steadily, culminating in a general strike in the Bataan free trade zone in June, 1982. President Marcos accused anion leaders of trying to embarrass him while he was visiting President Reagan in the USA. In the next few months, more than 40 trade

unionists were arrested. Having escaped the first round of arrests, Mr Beltran was picked up 10 plain-clothes military officers as he left a maxima of union officers. left a meeting of union officials on the evening of August 18.

Mr Beltran

### Sri Lanka tackles the damage From Michael Hamlyn

The immense task of rebuilding anka's shattered econom begins this week with the appointment of a five-member Rehabilitation of Property and Industries authority under the chairmanship of a retired rear-

No one will know how large a task faces the authority, which was set up under emergency legislation yesterday, unit the report of a central Bank of Ceylon task force is received later this week. But all property which was damaged during the week-long rampage of the Sinhalese against the Tamil minority is taken into public

admiral

ownership.

Using a technique said to have been pioneered by the British to deal with the damage left by the Second World War, the Sri Lankans intend to channel funds into factories and commercial premises to ge them working again as quickly as possible. In return, the state will take a majority equity shareholding in the business.

It has been estimated that 100,000 people are out of work because of the destruction of Tamil-owned industry, and the Government is anxious to put them back to work.

Mr Ronnie de Mel, the Finance Minister, met a group of aid donor countries and fun organizations in Colombo last night to raise money for rebuilding.

in the meantime Tamils who fled to refugee camps to escape the terror inflicted on them by their neighbours are being sped to the north by a fast-develop ing boat-lift

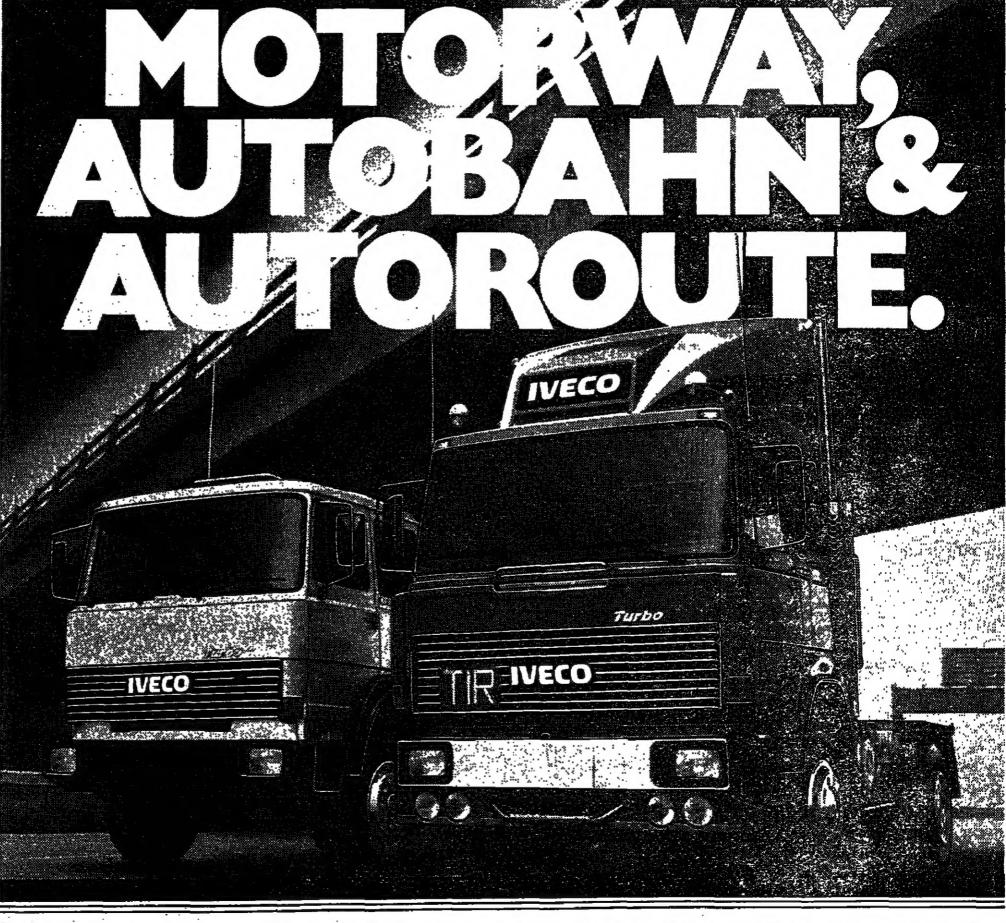

Already 14,239 refugees have been taken to Jaffna, which is predominately Tamil. The population of the camps has been reduced from around 130,000 last week to an expected 10,000 by the end of this week.

 Presidents admission: President Jayewardene said in a television interview yesterday that troops and police had sometimes encouraged the anti-Tamil violence (Reuter reports).

"The curfew was not en-forced strictly", the President told a BBC interviewer in Sri Lanka. "I think there was a big anti-Tamil feeling among the forces, and they felt that shooting the Sinhalese who were rioting would have been anti-Sinhalese; and actually in some cases we saw them

encouraging them." He said be was sending his brother as an emissary to Mrs Indira Gandhi, the Indian Prime Minister: Her Southern Indian states have caused a lot of trouble talking of an invasion," he said. "They are helping the terrorists. I told her that they are harbouring them. That's not a friendly act at all."

The President also spoke of threats against his life.

Whether you're an international haulier, an own account operator or a lone owner driver, check out NECO tractors.

From 24 to 38 tonnes and above, there's an NECO tractor to fit the bill. The Third Generation 190 series combines top level

specifications with outstanding performance and economy, it's available at 32.5 and 38 tornes GTW and it's vered by a 2 year driveline and 6 year anti-corrosion warranty. There are three engine options, all lightly turbocharged and understressed for maxin

established as one of the most reliable and economical

engines available anywhere in the world; a turbocharged,

reliability: 2 268 net hp aircooled 12.8 litre V8,

watercooled 13.8 km 299 net hp in-line six with

powerful tractors available.

Whatever road conditions you face, the 190 series has the performance, the power and the economy to get the job done. The new 165.24 range was developed specifically to meet UK regulations. Kerb weight is pared down to the

977 Ib fit torque rating at 1200 rpm; and the mighty watercooled 381 net hp V8 which produces a massive

1217 to fc of torque at 1200 rpm. It's one of the most

minimum, so payload and productivity are maximi To take advantage of raxation differences, the 165.24 is available at 24, 28, 32.5 and 35 tonnes GTW. Power comes from a 9.6 littre turbocharged 240 net hp engine, matched to the latest Fuller Multimesh

gearbox. This light kerb weight and powerful drive train combine to make the 165.24 the meanest machine on

the street. When Commercial Motor\* tested the 165.24, it turned in better fuel economy figures than any comparable unit. And if that doesn't make it the best buy in its class, the 165.24 is covered by a six year

anti-corresion warranty. IVECO is genuinely pan-European, the second largest truck manufacturer in Europe. NECO tractors are supported by an unsurpassed pool of international truck technology, the direct result of a manufacturing and marketing operation that produces an international range of more than 200 models and 1000 versions. In the UK alone, IVECO has 59 dealers covering road and construction vehicles; and offering full service and parts

There are also 3500 IVECO service points in Europe. Check out IVECO's tractor range. Then ask about

the total Operator Care service programme—at home

You'll find that for motorway or autobahn, autoroute or autostrada, nothing stacks up against IVECO. Contact your IVECO dealer today. Or call Eric Budworth on 060 65 3400.

# Newpath to the roots of illness

### By Ruth West and Brian Inglis

asthma or whatever it may be.

who by a simple twist or thrust can chance of survival. restore mobility; hypnotherapists who can banish, for a time, the craving for a little or nothing to offer in the cigarette. But most insist it is necessary to look for the cause of the lumbago or the media has examined the potential the craving for a smoke, if the problem is not to recur.

Alternative therapists preach, and many practise, holistic medicine, with its emphasis on psychological and social factors which contribute so much to the genesis of physical as well as emotional disorders.

Nevertheless most people who try an alternative therapy for the first time do so because they have either a nagging virus illness, or one of what are loosely called the degenerative disorders. It is these which have baffled medical

If your doctor tells you that you have a virus, what he ordinarily means is that he does not know what is the matter with you, and that if it is a virus, there's nothing he can do except prescribe palliatives, pain-killers and tranquillizers - or even antibiotics, useless though they are for a virus.

One of modern medicine's most notorious failures has been with respiratory disorders. That we can put men on the moon but cannot find a cure for the common cold has become embalmed as a cliché; bronchitis has similarly eluded effective treatment. And last summer the Lancet bemoaned the fact that the "sacred cows" in the treatment of severe asthma have been shown to be useless and even dangerous.

"There is no preventive measure or definite treatment that will alter the But the real trouble started course of multiple scierosis," the New England Journal of Medicine sadly admitted last November. With MS, migraine and many more, even the term "treatment" has largely fallen out of use, to be replaced by "management" of the disorder - a stark admission of helplessness.

In spite of the fund-raising organizations' glowing claims, it has come to be realized that surgery and radiation, the conventional treatment of cancer, have made no perceptible difference to the

> So long as it was believed that radical mastectomy and radiation worked, those who experimented with alternative therapies could be criticized as endangering lives. But that argument has collapsed, now that it is realized the benefits from conventional treatment are marginal and the adverse reactions ugly.

> The attractions of alternative therapies are best illustrated by examining three disease, heart diseases, allergy and arthritis.

### Heart disease

emphasized, heart attacks constitute the biggest health threat of our time, killing between 400 and 500 people

In the British Medical Journal nine months ago, Professor J R A Mitchell of Nottingham University showed just low useless, and often lethal, conventional treatment of heart disease has been. Though the article has been greeted with hostility, no one has effectively rebutted Mitchell.

"We must not allow the Nottingham nihilism to stifle our curiosity." a Papworth hospital consultant recently pleaded in the BMJ - the sort of criticism which is an admission that cardiologists are groping in the dark.

The treatment of heart disease is centred in hospitals, and yet most people who die of heart attacks are dead before they reach hospital - a powerful indictment of this focus lies in the evidence of controlled experiments which show that the survivalrate is no higher among heart attack victims who have been hospitalized than among those who have not.

Heart disease has roots in lifestyle. Those who smoke, consume too much animal fat and salt and too little fibre, and who take too little exercise, are at most risk. Epidemiologists are becoming convinced of this, alternative therapists, naturopaths, in particular have claimed it all along.

One of the most crucial factors in As the recent television series has of the patient. It is the "Type A" individual who cannot relax, and consequently drives his heart too hard, who is at risk.

ment reported earlier this year in the Journal of the American Medical Association, "meditation, yoga and progressive relaxation" can convert "Type A"s into "Type B"s, reducing their blood pressure and blood cholesterol levels, and significantly reducing the risk of a heart attack. Professor Herbert Benson of Harvard has called methods "the relaxation

response". This discovery is significant, because another important experiment, this one in Chicago, had shown that mortality from heart attacks was actually higher among patients who had received drug treatment for hypertension, than those in the control group who had not had drugs.

Professor M. F. Oliver, president of the British Cardiac Society, has declared that it is not yet certain whether "the risk by drugs is greater than the uncorrected risk".

It is a risk which need not be taken. The work of Dr Chandra Patel and others in Britain, as well as the recent apies, and they are rarely referred to in which precipitates the attack.

Allergies represent one of orthodox According to an important experimedicine's most conspicuous failures.

Because allergic reactions commonly occur in response to innocuous substances such as polien or cat fur, they were not taken seriously by doctors until very recently. Sufferers were often told they were simply being neurotic. No method of prevention has been found, other than avoiding the allergy "trigger"; and no effective treatment, apart from what is eupho-mistically called "management" by symptom-crushers.

The medical profession still tries to brush allergy under the carpet. "No suitable training exists," the Lancet has complained in an editorial. And there are "considerable differences of opinion" about management, even among those few who are regarded as

For the past few years Dr Ricahard Mackarness has been campaigning to alert the profession and the public to food as a source of allergy - something which many alternative therapists, particularly naturopaths, have been American experiment, has demon-strated that high blood pressure can be book Not All in the Mind, Mackarness reduced effectively and safely by has missed the point, many naturo-meditation and relaxation. # Great mysteries

We are often told that science will solve the great problems of our times sooner or later. What we are never told is who is going to solve the little problems of our times. In case any such authority does exist, I would like to list some of the small mysteries that

of our time

• Why is it impossible to design an airport trolley or a supermarket trolley that goes straight?

Why is it that we wash our faces with warm water and our teeth with cold water?

Why does it always happen that when an aeroplane comes to a dead halt all the passengers jump to their feet even though they know they are going to remain standing motionless for the next 10 minutes, instead of getting back into the seats they have just vacated?

● Why are jazz performances always prolonged by the desire of every player in the group to play his last note even though they know the drummer will always win at the ard?

Why do dog-owners cry out: "He won't hurt you" just as their animal leaps on you and plants his teeth in the nearest availa

· Why do we never see signiposts on the road reading "Slough and the East" of "Hatfield and the South"?

What do engine drivers do during those long, unexplained stops in the middle of

• What is the secret of design that enables teapors to dribble tea down their spouls onto the table instead of into the cup?

• What do firemen on engines do now there are no fires? Why is a man with an overdraft shid to be borrowing from the bank whereas if he has a healthy account it never occurs to the

bank that they are borrowing from him? Why is the most commonly asked

question in Britain ("How are you?") one that nobody ever wants the answer to? Why are the objects attached to hotel

keys now so big and heavy that it is impossible to get the key to the roum let alone lose it?

Why do men wear ties?

· Why are things more expensive in dutyfree shops than in real life?

Why is white wine called white wine?

Why are pornographic films labelled "adult"?

• Why is The Sun called a newspaper?

· Why is anything ever called the best thing since sliced bread?

 Why does perforating a sheet of paper with a line of holes make that paper harder to tear, especially along the line of holes?

Why has Arsenal Football Club changed its name to Hitachi?

• Why do the British always go to look for the sun when there is most sun at

Why do, butchers and fishmongers always close early and bicycle shops and

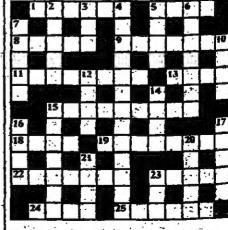

chemists always stay open late? Why do British Rail's guards announce

the destination of trains just after they have started, at a time when the information is at its least useful to anyone?

 Why do British Rail porters at mainline stations always end up on trolleys marked "For passengers' use only"? . Why do lists like this always end up

critizing British Rail even though the writer

**FASHION** 

at the impact made by British costume designers in the modern medium of cinema and TV film, and at how much time and effort is involved.

# Pretty as a picture

It is 13 years since MGM's between set and costume worldly goods were dispersed in designer is well established and a \$10m auction, and Judy everyone knows that if you Garland's ruby slippers from don't listen to the costume The Wizard of Oz went for designer at production meetings \$15,000, still the highest sum of you could lose a lot of money." money paid anywhere for part

of a production costume. The 1970s, which opened on that note, continued as a decade of reassessment and marked a rising interest in all categories of fashion. Clothes at the Victoria & Albert Museum had been elevated from glass cases to a costume court in 1961, and the staff noticed that at Cecil Beaton's 1971 Anthology of Fashion exhibition, the public were at least as eager to see Audrey Hepburn's Ascot dress from My Fair Lady as they were to see Fortuny's and Schiaparelti's real life innovations. Then in 1976 came the biggest of all costume exhibitions. Diana Vreeland's Romantic and Glamorous Hollywood Design at the Metropolitan Museum of Art, and a record 800,000 visitors were able to enjoy the truth of Irving Thalberg's remark that you can get away with anything if you make it

The observation is peculiarly American. British costume design is more firmly grounded, deriving from a unique 172dition of history and literature via the spectacular "historical" effects of the nineteenth-century theatre. We probably have more first rate costume designers than any other country, and there is more work for them than there was 10 years ago - more American productions here in pursuit of a good rate of exchange, the appropriate archi-tecture and untrammelled vis-tas of countryside, more television channels, more commercials. They are doing well on the British film front, too, because of the need to appeal to the American market, which means a shift in focus from the insular and current (and virtually costume-less) to the nostalgic and universal, like Chariots of Fire and Gandhi.

The gulf between designing for television and movies began to close with the coming of colour to television, BBC 2 in 1964 and BBC I four years later. "Costumes" split into two departments - wardrobe and make up - and both rapidly took on staff, "When I went to the Beeb in 1964 it was just a backroom servicing corner", remembers Judy Moorcroft, now an independent costume designer (The Europeans, Quarter, now working on the costumes for David Lean's Passage to India). "There was a hierarchy whereby the set designers were a creative part of the crew but the costume the crew but the costume designer knew his place and kept quiet. Now the dialogue

The credit for the first step up for costume designers in television is usually given to John Bloomfield, an ex-law student and ex-carpenter from Birmingthe clothes for the first big colour production The Six Wives of Henry VIII, which won two major costume awards. "It is the designer's job to help the audience to work things out", says John Bloom-field. "I set out to remind them who was who by dressing the Seymours in green, the Howards in red, and when the king was married to one or the red-gold."

Today the technical problems that used to separate television from film designers are reduced to a minimum.

movie, because there is just one camera", says Judy Moorcroft. "Otherwise the differences are obvious ones. Even on a big television screen the figure won't be more than a foot high, are important, shoes less so. For a film you must watch every detail. A spot of make up on a man's collar can make you squirm a lot when you see it at

Television does the smallroomed dramas to perfection -Jane Austen, Dickens, Trollope but the distinctions are blurring as more films are being made as co-productions between television and cinema to spread the costs, as happened recently with Channel 4 and the

you consider that the costumes for the three episode epic The Far Pavilions (a Goldcrest

top 15 costume designers began their careers at BBC Television, which has consistently promoted quality. The costume department today is run kindly but firmly in true Aunty fashion by Maggie McPherson, a 36-year-old ex-personnel officer, who explained the scale of the department. "Costume is just one part of a design and scenic services group", she told me. "With a permanent staff of 300, I'm the first head of department who has been interested in management and has not been a practising designer." Costume and make up, she said, have stayed an immensely long and for a mother hen, masculine or laborious business while other feminine, over 40, who won't departments have become computerized.

### THE TIMES DIARY

### Wells documented

The third volume of H. G. Wells's Experiments in Autobiography, which has been gathering dust for almost half a century, will finally appear a year from now. Faber has paid £20.000 for what its editorial director, Robert McCrum, says are very frank, vivid and candid memoirs. The volume could not have been published sooner since it deals in intimate detail with Wells's sexual relationships in particular with his love affair with Dame Rebecca West, who died last March. McCrum says the manuscript reveals many other sexual liaisons and some names will have to be withheld from the book "to spare the feelings of the living".

### Long arms

Britain has imposed an arms embargo on Israel since the end of June 1982. That does not prevent British firms from fishing for future orders. Menachem Eini, the retired general who heads the Lavi project to develop the Israeli air force's plane of the future, says: "We have had a proposal from Marconi which we are seriously considering." In the first instance the bid is for \$7m worth of computerized television and optical equipment to go into the cockpits of the prototype planes, the first of which are due to thy early in 1986. The value of orders to follow might be substantially greater since Israel is expecting to build 300 Lavis eventually. A spokesman for the GEC subsidiary Marconi Avionics said: "We decline to comment. We do not comment on someone else's statements."

### Bank role

The Theatre Royal, Stratford East, as encouraged by the Government, is looking for a sponsor to get in on the action. Nothing unusual in that, you might think, only the action they have in mind is a legal one against the Arts Council for alleged breach of contract by making a midyear one per cent reduction in the theatre's grant. The council pleads that it was obliged to breach faith by the Government's decree that it must cut all its spending by one per cent this year. In Stratford's case the reduction wipes out the one piece of private sponsorship the theatre had managed to generate this year, and forces the cancellation of an Alan Plater play. Letters begging support for a court case, which will be important for all Arts Council clients, are going out now, but really any litigious tycoon would do.

BARRY FANTONI

"Frankly, I've always had doubt about their claims on Page Three"

### Lost lament

The son of Bela Bartok is offering a reward of £500 for information leading to the return of two poems of desolation written by his father on his New York deathbed in 1945. Peter Bartók, a recording engineer living in Florida, is about to inherit his father's archives but is deeply distressed by the loss of the poems.
"I saw them when I took an inventory in my father's room after his death", he says, "There were six or eight poems in an envelope on the desk. One began: 'Lament in a foreign land', the other, 'A black carriage passes on a dark meadow'. I don't know if he wrote any music for them, but they reflected his terrible loneliness in exile and, perhaps, his sense of impending death. Everything in that room went into a trunk, and no one has heard of the poems

• John Hawkins received a letter from the Grand Hotel Osborne in Knokke-le-Zoute, Belgium: "... A member of the staff is warning children when parents are out, it is a very kind and and with your reservation. to be honorated with your reservation and remains, Yours sincerely".

### Dead Slow

Sir Peter Parker, no less, can cap my note yesterday about the InterCity guard advising passengers that if they got their heads knocked off they would have to collect them them selves. The chairman's tale is of a guard embarrassed at delay caused by a suicide throwing herself under the train. He eventually announced: British Rail regret the delay. There has been a fertility on the line."

possible to enjoy Steamed Dick with Vegetables at the Jabilee Dragon in Gerrard Place, while it was in Pembrokeshire that P. G. Walters tackled Veal Gordon Blue. Still, that was much the same dish as Alan Burns found at the Bec Fin in Ajaccio listed as Scallop of Veal Blue String, which ties it up nicely.

# Twopence for their thoughts

The left-wing councillors of the London Borough of Islington can hardly believe their luck. They want to produce a weekly newspaper at the ratepayers expense, and the Government has now pushed through legislation which will give them the powers to make this

It is a strange episode which begins and ends with the long-running boycott campaign oranized by the councillors against the established weekly newspaper, the Islington Gazette. It also demonstrates a careless disregard of its responsi-bilities by the Department of the Envoronment, and its willingness to accept a gross abuse of power by a local authority.
In May 1982, the Labour Party

recaptured power in Islington. It was hardly a glittering victory in one of Labour's inner city bastions. Labour-secured just over 51 per cent of the vote, and 51 council seats. The other 49 per cent of the voters, who supported the SDP/Liberal Alliance and the Conservatives, found themselves represented by a single councillor, a member of the SDP,

With the voice of opposition aimost silenced in the council chamber, the Labour Party, now dominated by left-wing extremists, moved against the Islington Gazette. A sister newspaper in the group owned by the Gazette had been closed because of unacceptable losses, and a strike had been called by the National Union of Journal-ists. The strike spread to the Gazette, but in spite of this the editor succeeded in producing the news-paper. The strike was prolonged and

bitter: but it was ultimately settled.

But the council had decided to flex its muscles. Labour councillors and borough officials were in-structed to have no contact whatever with journalists working for the Ga-ette; council advertising was withdrawn; officials in the expensively maintained council press office refused to speak to Gazette reporters, and others made it clear that even the most informal social contact would cause them embarrassment.

The news boycott lasted 14 months, despite the condemnation of the Press Council and the local government ombudsman. It was sovernment ombudstian. It was lifted only a few days ago in a statement made on behalf of the Labour group, which indicated that this was being done because the party was paying an unacceptable price in propaganda terms for the boycott. However, the advertising boycott, which costs the Gazette £20,000 a year, continues.

But at the same time the council had decided to intensify its attack on the Gazette. One of the first indications of this approach came in an interview given to the Socialist Worker by the deputy leader of Islington Council, Mrs Val Veness. Her own ideological position was set out in the starkest terms. She said "a (future) Labour government has got to take on the people who obstruct it, arresting them if necessary - arm the workers if necessary - elect the

judges".

Turning to the need for the Labour Party to counter the fear of socialism, she said: "Labour Party propaganda is very weak.... There's no counter propaganda in the media whatsoever. In Islington

by Lord Harris of Greenwich

have our own constituency paper and a council paper. We're also starting up our own alternative paper to the Islington Gazette, as a cooperative.

But Mrs Veness and her coleagues faced a serious difficulty. When officials of the borough council met representatives of the cooperative in April, it became clear that the £100,000 they needed for grants and loans towards the acquisition of property and the cost of refurbishment could not be provided (since then the total cost has risen to about £200,000). The borough solicitor told the council's employment grants and financial assistance sub-committee that it had no statutory power to help the

However, he added that this problem was about to be rectified. A small Government Bill - designed to amend a section of the Local Government Act, 1972 - the Local Authorities (Expenditure Powers) Bill, then before Parliament, would confer (quite unintentionally) just

Section 137 is the provision under which, in defined circumstances, a council can make up to a 2p rate available for grants for purposes which are of general benefit to its community. The new Bill widened councils' powers, under this section, so as to allow them to provide financial assistance towards the acquisition of land and the carrying out of building work; and this was precisely what the Islington cooper-

To the chagrin of Islington council, progress on this Bill was slowed down by Mr George Cunningham, then the SDP member for Islington South, supported by two Conservative MPs on the standing committee. Mr Cunningham explained how Islington proposed to misuse the proposed power, and Sir George Young, the environment department junior minister, undertook to consider whether the Bill could be amended to prevent such action being taken. When Mrs Thatcher announced the date of the general election, the

ative needed.

unamended Bill through in the dying days of the last Parliament. but it was frustrated by Mr

Cunningham, Soon after the election, the Department of the Environment reintroduced the unamended Bill. This time there was no George Cunningham in the House of Commons; by the narrowest of margins, he had failed to be reelected. The Bill secured a speedy passage, and arrived in the House of Lords just 10 days before the summer recess. It was rushed into law within that period. But this time the Government was compelled to answer the question: was it really prepared to allow Islington, and like-minded councils, to spend public money in this fashion?

Islington was denounced in robus terms by Lord Bellwin, the local government minister. I could not quarrel with his rhetoric, but why were councils to be given the power? And why was the Government determined to prevent this Bill from being amended so that such conduct would be unlawful?

Well, the Bill was "technical" and there was an urgent need to amend the law. The urgency was caused by the environment department's an-xiety to appease the local government associations, which wanted the law changed for entirely sound reasons. Because the Government's relations with the associations were under strain as a result of impending rate-capping proposals, the depart-ment wanted to press ahead with the Bill with utmost speed. It was determined to prevent amendments in the Lords that would hold up royal assent until the autumn and thus, it was feared, anger the local

authority associations.
So, after all Lord Bellwin's sound and fury directed at left-wing councils, he used his majority in the Lords to vote down an amendment that would have prevented councils from using public money in this

Many cross-bench peers voted with the Alliance against the Government and so, to their credit, did five Labour peers. Two former-Conservative ministers, Lord Boyd-Carpenter and Lord Rawlinson, expressed their serious concern Lord Rawlinson describing Islington's behaviour as "an absolute public scandal") and declined to support the Government

And so, a Government pledged by Mrs Thatcher to take a firm stand against left-wing extremism gave statutory authority for councils to give loans and grants to left-wing local newspapers. Mrs Thatcher, and her senior colleagues, have almost certainly been told nothing of this; indeed it is inconceivable that a department would have secured the assent of a cabinet committee for such a Bill, if it had known its full implications.

But as it is, a small pewspaper in Islington will have to fight for its life against a publicly subsidized giveaway newspaper. And what will happen in Islington could be repeated in Lambeth, Hackney; Southwark and the other authorities dominated by the left. It an episode that reflects little credit on the Department of the Environment, or

The author, a former Home Office

### **Roger Scruton**

# Going white after red-blooded conflict

Of all the conflicts that have shaken the civilized world, that between claret and burgundy has probably been the most beneficial. It is at once easily resolved and endlessly renewable. It begins in pleasure, and ceases in sleep, passing meanwhile through a glorious interlude of belligerent intoxication. Language, literature, history – all are brought to bear on this vital disputation, which has absorbed the after-dinner energies of countless politicians and businessmen, so stilling for a few precious hours the dangerous projects of production and reform. Men need conflict. The essential

requirement of civilization is to provide matter for conflicts which, while instructive and agreeable to those who are engaged in them, can do no conceivable damage to those who are not. The present conflict is one of the most educationally valuable that I know. What could be the state of th better illustrate the need for a classical education than the rival claims of Château Ausone and Mercurey, the one named from the estate of a Roman poet, the other from the temple of a Roman god? What could stir the English speaker's sense of history more effectively than Chateau Taibot, named from the great Earl of Shrewsbury; Haut-Brion, which might really be O'Brien; or the sheer enigma of names like Boyd-Contenac and Lynch-Bages? What could more poignantly remind us of the voice of poetry, than the great names of Burgundy - Vouceot, Chambertin, Meursault, Chambolle-Musigny les Amoureuses (a wine that generally lives up to the promise of its name)?

Beneficial though this conflict has been in the annals of our history, however, it is also to be regretted. For it is only the red wines of Bordeaux and Burgundy that can be fruitfully compared. The white wines are eclipsed by enthusiasms which largely disregard them. As a result one of the highest achieve-ments of western culture has been shrouded in ignorance. I am referring to white burgundy, without whose assistance it would be impossible for a philosopher to compress his thoughts into the measure laid down by the editor of

Naturally, anyone who encounters Le Montrachet will know that he is in the presence of the greatest white wine that mere mortals could make - at least he will know this if be is fortunate enough to taste vintages like those of 1959 and 1961. Most amateurs would also admit that there are white wines made in the there are white wines made in the Côte d'Or - Corton-Charlemagne, Bâtard-Montrachet. Meursault-Perrières - which, while not strictly comparable to Le Montrachet, deserve to be drunk with the same bellicose gratitude for the human condition as inspires and refreshes the conflict between claret and burgundy. Two important facts, however, are not generally under-

Why the Alliance

must save Labour

sometimes be obtained for as little as £6 a bottle. Should you be seeking for red wine, then at that price you must certainly choose claret.

. The second and more important fact - more important, that is, for those concerned not merely with the survival but with the spread of civilization - is that truly great white burgundies exist which almost anyone can afford. These wines are grown not in the Côte d'Or, but to the north of it in Chablis, and to the south of it in the Côte Chalonnais. The essential characteristics of

good white burgundy are three a flavour as full and rich as is compatible with disciplined dryness; a honquet that is neither sharp nor a tonique that is termed sharp not flowery, but rounded and heady, with a lingering suggestion of mouldy vegetation; and a dry, nutry after-taste, which returns after many hours, enriched with associations like the memory of a passionate kiss. These three qualities are rarely combined in a single experience, and it is arguable that only the Chardonnay grape can really unite them. It is the use of this grape, rather than the strict criteria of geography, that lead me to describe Chablis as a white burgundy.

The lesser wines of Chablis are of course well known for their crisp invigorating attack. But it is not widely appreciated that, in remarkable years like 1978, the wines of Chablis fill out, acquiring the three discounters of testimatics. dimensions of taste which I have mentioned, and becoming equal at their best to the very greatest products of the Côte d'Or. Aiready those designated premier cru man-age to combine the pebbly foretaste of Chablis with some of the lingering after-taste of the more southern vintages. But for a little extra money (the sum may be no more than £7 a bottle) the grand crus - with dour peasant names like Bougrots - can be obtained. Such wines equal the best products of the Côte d'Or, and in a good year may even surpass them. Unfortunately the widespread ignorance of their merit, which causes them to be so usefully underpriced, makes their manufac-ture far less profitable than justice requires. Hence the future of these great wines is increasingly precarious. I therefore urge the readers of The Times to lend full-throated support to this vital component of

While the English drinking public has begun to appreciate the white wines of the Maconnais, and to realize that St Veran and Macon-Genevrières are the equals of Pouilly-Fuissé, it has yet to discover the treasures that lie to the north of that region, in the Côte Chalonnais.

True, Montagny is now a familiar name. But how often does one encounter a white Rully, a white Buxy, or a white Mercurey, whose Elos du Petit Clou can can easily be mistaken for the finest Meursault? The greatest of these wines sell for less than cheap Champagne, and provide, by contrast, a grandeur and fullness of experience which may redeem even the vile dog days of a hot London summer.

# China: doing it by the book again

By creating a personality cult of Deng Xiaoping, China's most celebrated enemy of personality cults. Peking has handed Moscow's propagandists a made-to-measure opportunity for anti-Chinese

For several years the Dengists have reviled the Mao-worship which marked the two decades before the chairman's death in late 1976. They reserved special contempt for the Little Red Book of Mao quotations which is condemned nowadays for crippling national development for 20 years by preventing original

Now the party is printing 12,200,000 copies of the Selected Works of Deng Xiaoping, China's paramount political figure although he no longer holds the very highest offices of state. The Selected Works consists of 43 speeches, 39 of them never before published, given between 1975 and 1982.

The party, bureaucracy, and the armed forces have been ordered to memorize them, and China's top officials vie with each other to praise their newest hero in terms not heard since the death of Mao. Mao was the Great Helmsman,

the Great Teacher, and the Red Red

Sun in Our Hearts. Deng has become the Steersman, the Initiator, and the Chief Designer. Western China watchers have tended to dismiss the new personality cult as no more than the resuption of a quaint Chinese custom. It is undoubtedly a measure of Deng's desperation with the progress of his pragmatic reforms that he has had to adopt methods which he once so reviled and give China's chief enemy such ammu-

nition. scarcely credit their good luck. Medicine is a conjectural art, not a science. Medieval jocosity: "If you want to be cured of I don't know what, take this herb of I don't know what name, apply it I don't know where, and you will be cured I don't know when." Only in their nomenclature and jargon are doctors bewilderingly scientific, partly in order to blind laymen with their science. Language and medicine seem to go together. Doctors are logophiles and wordsmiths. Some of my most prolific and entertaining

and meanings are quacks. Medical jargon tends to be correctly derived from the ancient classics, since doctors tend to be scholars, if not scientists. Proper sesquipedalian jaw-cracker the word may be, as "adiadochokinesis". But anybody with a bit of Greek can work out that it means an inability to perform movements one after another, an inability to arrest one

correspondents about new words

"First August Radio," which pur-ports to be a clandestine Chinese army station manned by disgruntled Maoists, is really a Soviet confection operating from Siberia. It has pinpointed the paradox in the campaign to build the four-feet teninch Deng into an ideological giant.

"Most strange", the Russian black propagandists broadcast recently, "are the claims in several articles in the Selected Works that personality cults brought near disaster to the whole party and the people." The broadcast recalled, too. Deng's scom for the cult created by Mao's selfproclaimed successor, Hua Guofeng, and ended by quoting Marx on historical mistakes which appear first as tragedy and later as farce.

These are well-aimed blows. Deng has indeed spoken severely of Mao's vainglorious last 20 years (although he claims to revere Mao thought) and of Hua Guofeng's "whateve-rism." which held that anything the late chairman ever said or did was

Now, "First August Radio" notes triumphantly, "someone in the central organs has created a 'new whateverism' whatever utterances are made by a certain person must be complied with."

Unfortunately for the Dengists, this is only too true. As the party braces itself for the upcoming three-year "consolidation", or purge, designed to winnow from its 40m-strong ranks all undesirables, Deng's Selected Works will be its bible.

Last week, the Central Committee proclaimed: "The study of the Selected Works of Xiaoping is an important ideological preparation for an overall party consolidation. It warned leading cadres to examine their pasts, even as far back as 30 years, and by "assiduously studying

Deng's photograph and signature from his Selected Works

the Selected Works be at one with the Party Central Committee".

At 79, Deng remains a tough little fellow. Like many short men he fancies himself two feet taller. "He treats me like a dead ancestor", Mao once complained of the man who served him for 12 years as party general secretary and backed him in the worst excesses of the late 1950s: the communes and the Great Leap

Forward. He is readying his forces to fight future battles for authority, perhaps after he is gone. Several million

some of them more than 25 years ago (and overseen by party general secretary Deng) have been rehabili-tated in the past four months alone and 470,000 party members, once disgraced, have been permitted to re-enroll. Deng is encouraging China's 800m peasants to "get rich" through private endeavour.

Academy-trained army officers are assuming commands once held by devotees of the People's War who, in Deng's dismissive phrase, still believe "all a soldier needs to fight victoriously is a bag of grain, a rifle, a grenade, and the correct attitude". One of Deng's top commanders has just admitted that for the next two decades China will not be able to defeat a properly equipped adversary.

Since the time of Confucius over 2.500 years ago. Chinese have sought wisdom from texts. Foreigners used to marvel when China's table tennis champions and brain surgeons paused to consult Mao's Little Red Book about their next moves. Devotion to that once-hallowed volume has been declared to be mindless "bookworship", and the 12m or so copies of Deng's Selected Works appear a mere trickle compared to the 200m copy avalanche of the last volume of Mao's works.

But for those awaiting the party's inquisition, who have been invited in some cases to reflect on their last 30 years, Deng's words are holy writ.
Otherwise, why would 2,250,000 copies have been snapped up on the first day of sale?

Jonathan Mirsky The Selected Works of DXP (in Chinese) can be obtained from Guanghua Books, 7-9 Newport Place, W.C. 2.

lactose. Thomas Dover was the Bristol GP, 1660-1742, who treated Thomas Sydenham for smallpox with a diet of oil of vitriol and 12 pints of beer a day. Many of his patients were rich slave-traders, but he treated the poor free. In 1708 he forsook medicine to lead the most successful pirate expedition in Spanish cities of Equador and Chile. returned to England in 1711 with a

tell me, who was Coude?" .

has not read the book "Oh, he was a Coude means "bent like an elbow".

Eighteen months ago, when the Alliance has a reasonable chance of SDP-Liberal Alliance was taking winning in the next election are at winning in the next election are at votes equally from the two other present Tory-held; and the best chance of winning them lies in establish itself as a centre party. But simultaneously winning over disilafter the general election in which it lusioned Tory voters and persuading pulled the Labour Party down people who voted Labour this time ilmost equal to it in votes cast; to switch to the Alliance - the while leaving the Tory vote largely famous tactical vote advocated by intact, many people wrote and talked as if its vocation were to. the New Statesman to get the Tories out. In other words, a pooling of destroy and replace Labour. The collapse of the Labour vote at

Labour and Alliance support.

Clearly a lot of that happened, in the general election and at Penrith. But it is hardly reasonable to expect it to go much further in the next election if the Alliance appears to be interested only in displacing Labour as Her Majesty's Opposition. What the Alliance should be offering to make voting for it seem worthwh is the prospect of a centre-left coalition to replace the Tories: a government that would set about repairing what is left of the welfare state and rebuilding what has been destroyed.

If the Alliance tries to pretend private, are now not even aspiring to form a government in 1988 but just to establish the Alliance as "Her Majesty's Loyal Opposition". That implies a third consecutive term of Tery, presumably Thatcherite, rule. that it can do this without the Labour Party, it will put itself in the position which social democrats in Italy have suffered from ever since the war, and in France until 1981, where they faced the choice between remaining for ever in opposition, or governing in coalition with the right.

The Labour Party in this election

got almost exactly the same share of the poll as the communists got in Italy on June 26. Even if it were reduced to the size of the French Communist Party (20 per cent until 1978, 15 per cent in 1981), it would still be enough to deny the Alliance a majority, especially under PR which the Alliance is pledged to introduce. François Mitterrand solved this

problem in France by forcing the communists to support him on his own terms. Their leaders did not want to, but they dared not take responsibility before their own voters for keeping the right in power. At some time between now and 1988 the Alliance will have to do the same to the Labour Party. After all, it was only through the Lib-Lab pact that Labour itself first became a significant parliamentary force in 1906. The Alliance now. needs to repeat that operation in reverse, by offering Labour an electoral pact based on an agreed minimum programme, one item of which must be PR so that never Labour decline to continue. But it is again can a Tory leader claim a landshide mandate on the basis of a

### SECOND IN COMMAND

Recognizing Mrs Thatcher as a politician of quite exceptional stamina and will-power, the nation will be disposed to accept the hyperbole of her statement, on leaving hospital, that she is 101 per cent fit. Her added gracenote, "I am feeling fine, but then I always am" did, however, sound a little like tempting Providence, Mrs Thatcher, if less liable than much of humanity to the risk of incapacity through illness or mishap, has no immunity; even Achilles had his heel. Happily, the Prime Minister has recovered speedily from an eye-operation which has apparently been a complete success, but the episode is a reminder that Prime Ministers do have an obligation to make satisfactory provision for their rôle to be fulfilled when they are temporarily out of action. In other words, they need a deputy.

In Lord Whitelaw, Mrs Thatcher has a deputy who is hand-made, so to speak, for the job. He is of proven loyalty to her personally, and he is a man of great political experience and maturity. He would have been the Conservative Party's choice for leader, and eventually Prime Minister, if Mrs Thatcher had not been elected to preside over something like a revolution in the party's social and economic thinking.

Yet there is now a little more than that to be said about the be leader, yet his position gives deputy to the Prime Minister in the present government. A rather the reverse. Conservative deputy's position is, of course, quite different from about who would manage the that of his Labour opposite number. The Labour deputy leader is elected, formerly by. Labour MPs, now by the monstrous parliamentary and extraparliamentary apparatus which elects the leader. If Labour reaches office, there is no doubt

Minister must be (though the office remains unknown to the constitution of the country) whether the Prime Minister likes

it or not In what used to pass as normal times for the Labour Party, this created no problems. But as the ideological divide has widened in the Labour Party, its deputy leadership has taken on a special significance. Mr Denis Healey was chosen precisely because he represented the pole of Labour politics opposite to Mr Foot, in the vain hope that this balance of influence would help them pull

the party together.
Those who now feel that it matters for Mr Hattersley rather than Mr Michael Meacher to be deputy to Mr Kinnock make the same assumption. But as Mr Healey's experience has shown, the deputy's influence depends far more on the calibre of the individual than on the formal power of the office, and what matters from the national point. of view is his ability to take charge of a government in the Prime Minister's absence.

Yet though there is little distinction of function between a Labour and a Tory deputy, each comes to his position by a different route. The Conservative deputy is appointed by the Prime Minister. He is invariably a figure of great influence in the party, who is respected on all its sides. He is someone who could him no assurance of succeeding;

There is therefore no problem government in Mrs Thatcher's absence, and certainly none that would be solved by the nonsensical idea, canvassed from the Tory backbenches last week, that Mrs Thatcher needed her own Minister of State to take day to day charge of her office in her whom the de facto deputy Prime absence; who would take instruc-

tions from him? Yet Mrs Thatcher's temporary incapacity has illuminated a potential problem and it arises from Lord Whitelaw's translation to the Lords. If Mrs Thatcher were ever incapacitated for any length of time, would it be feasible for the Acting Prime Minister (for that is what the deputy would become) to be in the Lords?

In the recess and in calm times it would not matter, but in the event of a crisis, international or financial, it might well. Some-body would have to speak, with as much Prime Ministerial weight as possible, in the Commons, and it is questionable whether the departmental Cabinet Minister, whether Foreign Secretary or Chancellor, could do so while there was an acting Prime Minister in another place.

In the Commons, the most obvious candidate is Sir Geoffrey Howe in terms of seniority and experience. It is understandable that Mrs Thatcher should not want to make a change. For one thing, she is loyal to Lord Whitelaw; for another he is the most comfortable kind of deputy to have. Moreover, any Prime Minister likes to keep her, or his, options open and not to seem, by appointing a deputy, to influence the succession. But that is not how it would work in practice as recent history has shown. It would pre-empt nothing if she decided that her deputy ought to be in the Commons. The present situation is a convenient one. both because it allows time for the talent with the right weight to make itself felt in the Commons, and also because nobody in the meantime is breathing down Mrs Thatcher's neck. Even so, her recent mishap has given Mrs Thatcher something that she would be well advised to think about, in a leisurely way, during the coming months.

### FACTS COME FIRST

Tank study of long-term trends last autumn's unnecessary, enin public expenditure is remem- ergy-sapping furore? bered, if it all, outside the inner. circle of policy-makers and commentators for one thing: the suggestion that the Thatcher administration wished to kill the National Health Service. Such a Think Tank's paper to the Cabinet. The tank's submission was a discussion document on what would need to be cut, on various assumptions of economic growth ranging from the optimistic to the pessimistic, if spending was to be contained within certain ceilings. But the canard stuck. The episode was an object lesson in how not to, conduct a serious debate on an issue - how are public services to be funded in a low or nil-growth society with an aging population without punitive, self-defeating increases in taxation - which affects the prospects and well-

The Government drew the wrong lesson from the Think Tank affair. Ministers seemed to assume that the leak had made rational discourse of the issue impossible for the immediate future. There was a tightening of Whitehall security and discussion was postponed until after the general election. It has now revived. The Prime Minister has let it be known that the long-term financing of the wel-fare state is under review. What should the Government do as papers begin to circulate in

being of every citizen.

Last autumn's leak of the Think Whitehall to prevent a reprise of

Ministers could cast their minds back beyond September 1982 to 1942 and 1978. Both years provide examples of howto conduct a sensible debate on social policy. The popular version of the Beveridge report on social insurance was a bestseller. The debate it stimulated was excellent as at least one member of the present Cabinet will remember. Lord Hailsham, as Mr Quintin Hogg, MP, was very active in pressing the cause of reform on the Tory party. Beveridge wrote in a way which caught the imagination of the public. He identified five giants on the road to reconstruction and put them in capitals - Want, Disease, Ignorance, Squalor and Idleness. Whitehall does not produce White Papers like that anymore.

In 1978, the Callaghan administration completed a review of supplemetary benefit by publishing a Green Paper supported by background documents of statistics and analysis. Discussion was limited by the standards of Beveridge in 1942-43; but it was of high quality. That should be the model for the Thatcher review of Beveridge's brainchild which must be conducted now - thought, research, publication of background information, debate, action.

The Cabinet must agree a set of clear objectives, then com- sovernment.

While the calculation of GRE -

that are, in essence, quite simple.

The Government seems to have

From Professor S. A. Walkland Sir, In the current argument about

rate-capping by central Government and its effects on local democracy and accountability, I am on the side of the local authorities. This is not to deny that there is a problem. But there is a marked lack of discussion of what is at the real root of the matter, which is the lack of any real political accountability of a very large number of British local authorities.

Neither your otherwise good leading article of August 2 nor the Layfield committee examined this problem. This lack of accountability is directly traceable to the electoral system in force for local elections.

It is not that the issues of local spending do not get extensively discussed in local government election campaigns, but that conclusions reached after wide democratic argument, and which receive majority electoral support, more often than not cannot affect in any way the outcome of the election. which is in many areas a foregone conclusion. My own city of Sheffield - on the Government's hit list - is one of the best illustrations of the

truth of this argument. The way forward out of an apparent impasse is to change the local government electoral system to one of PR, but this is not a solution likely to come from this present Government nor from the Labour Party. Both have too much to lose.

Yours faithfully. S. A. WALKLAND, University of Sheffield, Department of Political Theory and Institutions. Sheffield. South Yorkshire.

From the Leader of Southwark Borough Council Sir, Your leader writer on August 2 finds it difficult to feel much sympathy for the councillors of Southwark. Despite that I welcome your recognition that the Govern-ment White Paper plans are

August 2.

ridiculous. MP's and Civil Service computers are never going to be able to make sensible decisions about local needs. There can be no replacement for the locally elected representative who lives in the community and is accountable to local people. The very idea of a councillor embodies the notion of someone who balances what the commutty wants and needs against what it can afford to pay. If we get that judgment wrong we do not get re-elected.

It is indicative of how out of touch the Government is that its proposals are condemned on constitutional grounds by every local authority association, irrespective of political control, and by academics and most newspapers.

Perhaps a little sympathy for Southwark councillors is due. We have already experienced the heavy hand of Whitehall. We have had our planning powers over a major part of our borough removed and our land seized to be given to a nonelected development corporation. We have seen our efforts to consult the public about their wishes for the

### been avoided with the help of In-court conciliation The Committee maintains that

From Mr John M. Westcott

Sir, The Interdepartmental Committee on Conciliation, whose report has just been published, concludes out-of-court conciliation schemes do not save money overall and therefore should not receive financial support from the Government. The Committee proposes that conciliation is best provided by incourt systems.

I write on behalf of a mumber of Bristol solicitors practising in family law who have regularly referred clients to the Bristol Courts Family Conciliation Service - the first of the out-of-court conciliation agencies to be set up - during the four years of its existence.

if any of us had been asked by the Committee - and none of us was we could have referred to many cases, particularly in custody or access disputes, where lengthy and expensive court proceedings have

### Student unions

From Mr Paul M. Jowett Sir, With all respect to Roger Scruton (feature, August 2), whose articles I find refreshingly radical despite their self-avowedly rightwing nature, does he have to liken every activity of the left in this country to the machinations of the ore-war German Nazis during their all-out contest for power?

Surely even the readers of the Salisbury Review expect a broader sweep of historical examples in literature aimed at bolstering and consolidating their views. Yours sincerely,

PAUL M. JOWETT United Oxford & Cambridge University Club, 71 Pall Mall. SW1.

### Slaves in England

From Mr John Gillard Watson Sir, It was in 1772, in the Somerset case, that Granville Sharp obtained the dictum from Mansfield that any slave, so soon as he sets foot in English territory, becomes free. This must necessarily apply to the wretched persons described in recent correspondence in your columns. Why, then, do these people not exercise their freedom?

One can hardly doubt that for a century or more after the Somerset case anyone enslaved by any embassy who walked out would indeed have been free, with the full protection of our laws. But today, what reliance can such slaves have that a craven Foreign Office will not forcibly return them to their

It is worth remembering that the 13th Amendment to the American

### Other ways of eyeing countryside live on what is now a small farm. form of development of parts of the

From Mr C. P. Righton

Sir, Mr Hart has managed to confuse himself as to what he is driving at (feature, August 2). He call it a hard criticism of farmers that their incomes rose in the last two years and then goes on to say that the return on capital is so low that only the very rich can afford to farm! Are we supposed to be making too much money or too little?

We have £9,500,000 in rent arrears Perhaps someone who was not so as tenants struggle to balance their own budgets. We have thousands of intent on pursuing the politics of envy would have pointed out that empty properties we wish to bring into use. We have hundreds of farm incomes were halved in real terms in the previous five years. The net result is that real farm income in 1982 was still 20 per cent below the It is central Government that already restricts our investment in average level of the 1970s. coping with these problems and

The value of land is really prevents badly needed housebuildimmaterial in this context. It tends to rise or fall in the longer term to ing and renovation. It was also decisions by central Government to encourage high-rise building which reflect its earning capacity and it is a fact of history that the return of capital in agriculture has always led to many of the problems we now been low, Farmers are pefectly well Nobody in their right mind aware that they could make more money by selling up and investing the proceeds in gilts: it is fortunate believes any more that central Government knows best. That is what you have to believe to support for consumers and for the countrythe proposals of the White Paper on side that farmers are not solely concerned with profit.

It is no fault of farmers that they are unable to buy British combine harvesters and, so far as tractors are concerned, we exported £350m worth more than we imported last

To imply that farmers are being paid too much to produce food is to ignore the facts. The truth is that the real cost of food has been falling for years. There has, of course, been inflation but the rise in the prices received by farmers, averaging out at 7.1 per cent per annum between 1977 and 1982, compares very favourably with the 9.5 per cent for food, the 12.7 per cent for non-food items and the 14.3 per cent for average earnings. The continuing improvements in agricultural efficiency have meant that consumers now enjoy a greater variety of better food at less expense than

ever before.

If it is accepted that this development is economically beneficial, then the valid question which Mr Hart could have asked is whether the results have justified the necessary changes in the countryside. The emotional comparison of English fields with a "vast prairie" is hard to comment on objectively. We all regret the passing of the familiar. The simple fact is, however, that our countryside has continuously changed throughout the centuries to meet

changing circumstances. Neolithic enclosures? Roman illas? Open fields? Enclosures? Which is the "natural" form for the British countryside? Are we seriously expected to farm economically in the 20th century with the methods

Yours faithfully. C. P. RIGHTON, Deputy President, The National Farmers' Union, Agriculture House, Knightsbridge, SW1.

From Mrs Susan Ranson Sir. Perhaps Mr Hart (scature, August 2) would like to visit me. I

Rupert Brooke's grave From Major Douglas MacRae-

Sir. As you mentioned Rupert Brooke's birthday among today's anniversaries (August 3) I thought

your readers might be interested to know that a marble plaque, engraved with his fifth war sonnet, was placed at the foot of his grave last month. Brooke was buried in an olive

grove in a most inaccessible part of the island of Skyros. A beautiful marble monument was conveyed there in 1920 by Stanley Casson, the archaeologist, who took three weeks to install it. The only inscription it bears, apart from the poet's name, is in Greek. This was originally

Wissett. Halesworth, Suffolk. July 28. composed by a Greek interpreter,

who wrote it in pencil on a wooden cross just before the interment on April 23, 1915.

It is worth noting, too, that the physical task of embedding the plaque with professional skill against the plinth on which the monument rests was carried out voluntarily by the Mayor of Skyros, Mr Ftoulis,

and two leading citizens of the

island, one of whom was a local master mason. I was privileged to be

there. Yours faithfully, D. MACRAE-BROWN, Meads School of English for Foreign 2 Old Orchard Road, Eastbourne.

### Soviet 'moles'

From Mr Malcolm Muggeridge Sir. I was greatly interested by the letter in your issue of July 25 from Professor Roderick Floud about accusations that his father, the late Bernard Floud, MP, had been a Soviet agent in the vein of Blunt, Burgess, Maclean, Philby, etc. etc.

Bernard Floud and I became friends in 1940 at Mychett Hutments, when we were both privates m what was then called Field Security and became the Intelligence Corps. There was, I know, some sort of hold-up in his getting a commission, but in due course, as I was given to understand, full clearance came from MIS and he appeared in a particularly smart officer's uni-

He and I had many arguments, and certainly he had strong leftish views to which he gave ardent expression. Yet I never detected. and looking back cannot recall, any intimation in our talks that he had any special fancy for the USSR under Stalin.

He was an attractive and gifted person; I liked him and enjoyed his company, and when our military service paths separated we corresponded and occasionally met. I remember meeting his charming wife-to-be. Undoubtedly, there was some sort of conflict going on inside him, and this may well have concerned divided loyalties.

In any case, I heartily agree with his son that the time has come for releasing for publication and historical presentation all the data concerning espionage in the earlier decades of this century, especially in the thirties and forties. Further speculation can be unjust and hurtful and anyway is becoming unbearably tedious. Yours etc

MALCOLM MUGGERIDGE. Park Cottage. Robertsbridge. East Sussex. July 28.

### Innings closed

August 3.

From Mr Robert Brooke Sir. I was interested in the correspondence (July 21) prompted by the New Zealand cricket team's scoring 544 against Somerset at Taunton without the aid of an individual century. This was beaten when Essex scored 560-9 against Sussex at Leyton in 1933, with a highest individual innings of 93, and at Taunton in 1930, when Somerset totalled 545-9 against Hampshire with a highest score of 88.

However the accolade must go to Nottinghamshire. Against Derbyshire at Derby in August, 1899, six of their batsmen exceeded the halfcentury, but the best individual contribution to their all-out total of 581 was William Gunn's 90. Yours sincerely.

ROBERT BROOKE, Editor, The Cricket Statistician.

4 Milton Road, Bentley Heath. Solihull, West Midlands.

### Pointing the way From Mr David H. R. Yorke

Sir. As part of the Government's spending cuts have secret restrictions been placed on the supplies of

paint for punctuation marks by signwriters? A journey last week yielded three

signs whose meaning would have been made clearer (or indeed reversed) by some punctuation after the initial warning or exhortation. Near the entrance to Ragley Hall

is the delightful "Lambs drive slowly". By the towpath of the South Oxford canal lurks the more sinister "Sheep dogs will be shot". In my neighbouring village of Lindfield a traffic sign proclaims "Give way markings erased" - should I stop er noi?

Yours in confusion (comma). DAVID YORKE, Helford Manor. North Chailey. Sussex. August 2.

### **OBITUARY** SIR FREDERICK KEARNS Agricultural adviser during EEC negotiations

Sir Frederick Matthias He was brought back to Kearns, KCB, MC, who died on August 7 at the age of 62, had a Finance Division in 1960 and long and distinguished career in the Ministry of Agriculture. Fisheries and Food. He played a ing in his appointment in 1973 crucial part in the agricultural aspects of Britain's entry into the European Communities.

As a member of the team which negotiated Britain's terms of entry, and as the chief agricultural adviser during the renegotiation phase he did more than anyone else to find ways round the multiple domestic and international agricultural issues that arose. In the process he became widely respected in agricultural circles not only here and elsewhere in the Community but in countries like New Zealand which were much affected by the outcome of the negotiations.

Freddie Kearns was born in February 1921 in Burnley and from Burnley Grammar School won his way to Brasenose College, Oxford. He was able to complete his degree there before entering Sandhurst in 1941. Commissioned in the Royal Fusiliers he saw active service in North Africa and Italy and was awarded the MC in 1944.

One of the "reconstruction" recruits to the post-war Civil Service, he first came to prominence in 1956 as secretary of the Committee set up after the Crichel Down affair to improve the Ministry of Agriculture's regional organization. As a result of the Committee's findings a number of Regional Controller posts were set up and Freddie himself was appointed to the one at Newcastle. He was at home in the North and did a great deal to get the new organization going there and to one daughter. But he also leaves establish good working relations a much wider circle of friends between the Ministry and and admirers for whom life was his region.

to the newly created post of Second Permanent Secretary in

the Ministry. He retired in 1978 and became an adviser to the National Farmers' Union and to more than one leading company connected with the agriculture and food industries,

Kearns was no pallid bureaucrat. His strong personality was never suffocated by the system or suppressed by any of the demanding jobs which he undertook. He was vivid - in his opinions, his language and his commitment to the public good and to the colleagues with whom he worked. He would brush aside the red herrings and sacrifice the less important in order to achieve the main objective.

He was not a comfortable colleague but he was one who inspired much affection. Ancedotes about him were many but rarely malicious. He used a subtle mind to great effect and had courage when it mattered most. But bakind the tough buccaneering exterior, there was another hidden personality, with a deep humility and a strong Christian faith. This practical expression in Blackheath where he lived and in an interest in church liturgy, which in turn derived from his great leve for English hierature and poetry.

He leaves a widow, Beily, whom he married in 1946 and farming and other interests in enriched by his verve and his region.

Masquerade Museum of London

The Japanese Print Since

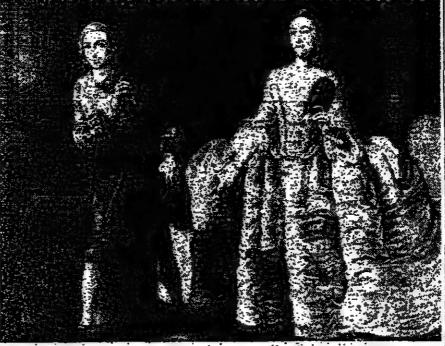

**1900**:

British Museum

Fortunately, perhaps, the fortorn cry of "But is it Art?" is seldom these days heard in our land. Of course, loftly theoretical nsiderations of the name and nature of art have their place, but as a hurdle in the way of response to the thing before one they do tend to waste rather a lot of tine. Or did; for, after conceptual and minimal art, who is going to worry too much about whether a pot or a photograph or a popular print can qualify? Indeed, we even have a further let-out clause proposed: if the individual works exhibited are of dubious status, it is quite possible that the exhibition itself may be a work of art, and its organizer the true artist.

I doubt if the Masquerade show which has finally opened at the Museum of London (after a two-week hicrup with the air-conditioning) and runs until October 2 would make such pretentious claims for itself. And yet it is a perfect example of that type of show, somewhere between an art exhibition and a history lesson, for which high claims have recently been made. What it attempts to do is to recreate for us the look and the sound and the atmosphere of that peculiarly eighteenth-century obsession, the masked ball, and all that went to cater for it. In England, and particularly in London, the most familiar by-product was the pleasure garden. Initially haunts of the grand (visiting royalty, we learn, were permitted to keep their masks on after everyone else had been required to take them off, which must have made for a rather obtrusive form of anonymity), they later went down in the world and became, as The Ticket-of-Leave Man makes clear, haunts of rogues and vagabonds before they were finally swept away. Who now remembers gay Cremorne, the poet plaintively inquired, and indeed today the names of Vauxhall and Ranelagh have very different associations: even the Festival of Britain's brave attempt at Battersea went the way of its more illustrious predecessors.

But records and reminders of many sorts survive, and they are assembled here

Meeting at the ball: Francis Hayman's David Garrick and Hannah Pritchard in "The Suspicious Husband"

in a show of singular grace and charm. Though there are arguably no paintings of first rank, we can explore a number of still first rank, we can explore a number of still attractive boways of eighteenth-century portraiture, and formily enough we are frequently reminded of the earlier paintings in the Art of Cricket show; if family groups and individual portraits (especially of teenage boys) were liable to be decorated with the accountements of cricket, to the extent that it became almost a sub-genre, here we have another, parallel sub-genre, the masquerade portrait or portrait group, with the young and glamorous at least clutching masks, and maybe wearing a whole elaborate fancy dress. Even the painters – Hayman, Zoffany, Benjamin West, or at least attrib - are often the same. We can admire the most popular historical styles assumed in paintings like Zosfany's portrait of John, Lord Mountstuart in Vandyke costume or Thomas Hudson's portrait of Mary Panton, Duchess of Ancaster dressed after a Rubens. We can even see some original costumes, listen to the music they would have heard, see what hasty things Hogarth and Rowlandson had to say about such diversions, and still sensibly wish we were

There is unlikely to be much question on the status of the works in The Japanese Print Since 1900 at the British museum until September 11 - even though it starts' with the bloodthirsty jingoism of popular journalistic prints recording Japanese victories in the wars with China and Russia at the turn of the century. Even these, to be fair, show a remarkable ability, which seems to be specifically Japanese, of seeing even the most unlikely subjects in terms of elegant (and possibly heartless)

aesthetic effect. Thereafter the work it is a problem that had been divides down the middle, between those apparent earlier in this concert divides down the middle, between those artists who clung determinedly to the traditional subjects as well as the traditional forms, as though art alone could keep the West and the modern world at bay, and those who with equal enthusiasm embraced the West and to enthusiasm embraced the West and to employ the familiar techniques of the colour woodcut, to revolutionize the amusical self to help him along, and the challenge of Davies's seems to have made

cultures. A print like Kampo Yoshikawa's Early Morning Mist at Sanjo Ohashi (1924), with its reverberations between East and West - the stylistic affiliations may be French, but with that segment of the French school which had been radically influenced by Japanese art a generation or two earlier - at once banishes all doubts about the health of clinging even so far to the past, while Fujita's prints, though frequently made in the West, retain throughout a strong sense of his eastern heritage. Later we have extraordinary contrasts between Sumio Kawakami's immediately postwar but backward-looking series Scenes of Last Tokyo, and the amazing original creations of Reika Iwami's abstract prints, with their intricate combinations of colour and embossing. If, after this, most of the Japanese prints shown from the last two decades look disappointingly as though they could have been made anywhere in the world, that is probably just one of the

### Concerts

Fires of London Albert Hall/Radio 3

Until Mozart came along. anyone writing string quartets was bound to imitate Haydn. In rather the same way Peter Maxwell Davies has planted his musical personality on his particular ensemble, the Fires of London, and in turn his music has been partly shaped by the association. For composer, players and audiences it is an entirely beneficial relationship. but it may not be so for other composers writing for the group, be they so eminent as Elliott Carter, whose Triple Duo on Sunday, though it came wheeling into the Albert Hall in an arc of sustained imaginative energy, was not totally untroubled by the difficulty of not being Davies.

The problem is that any thetorical gesture or formal sends one into Davies's world. in Cimmerian Nocturne by the young Philip Grange, though that piece certainly showed a composer who has his own ideas and knows how to make Japanese way of representing reality.

As one might expect, the most interesting prints are often those by artists who contrive somehow to straddle the two emphatically characteristic than

is usual. ery fast: it must have been a them. Herculean task for the players to have brought it to this pitch of invigoration within a few months of first seeing it (they gave the world premiere in New York on St George's Day, It is also determinedly abstract.

Carter speaks, as often before, of a dialogue among different characters, here taken by the Tallis Fantasia, on the other three duos of strings, woodwind and piano-percussion, but it is glorious reddening sunsets exceedingly hard to put words to what they say, except perhaps in the middle when the tempo slows and the strings provide a cushioned bed for the others to plonk star-sounds on, or at the end when the switch is thrown on a new sparkling interplay events move so fast that one John Russell Taylor seems to have lived through

several epics, successive and simultaneous, and yet the clock shows only 20 minutes have

Another 20 went unexpectedagreeably in the company of Davies's Revelation and Fall where, notwithstanding Mary Thomas's still hair-raising fit of vocal madness, the ear was opened by John Carewe's direction to this score's immense subtlety and exact ригросс.

### RPO/Bernard

Barbican

Raymond Gubbay reaches the audiences other concert promoters cannot reach - or have lost interest in reaching. Let no one say that the Barbican cannot attract people; on development. coming from Sunday a queue that stretched these players, almost inevitably most of the way round Level 3 was turned away as the Royal Philharmonic played to a packed house.

The concert was scarcely unusual for its repertory, but it brought a conductor. Andre Bernard, whom we are more used to hearing as a trumpeter, and a soloist, Jack Rothstein, whom we are more used to hearing as a leader. Bernard offered Beethoven - Leonora No J and the Fifth Symphony and Vaughan Williams: both composers were characterized with a flamboyance of gesture and wild abandon of expression Most of it is fast, much of it that would surely have amazed

The procedure almost worked in the Leonora Overture because Bernard's technique obviously studied at the Leonard Bernstein School of Balletically Mimed Interpretation - though somewhat imprecise, at least seemed to arouse the RPO to fury. In the around Vaughan Williams's simple, affecting treatment of Tallis's melody was unhappy. In Max Bruch's famous First Concerto, Jack Rothstein was not the most smooth or silken soloist it is possible to imagine. on a new sparkling interplay but his playing had an unaffec-just as 11 begins. Otherwise, ted strength and directness.

# If you want to know which computer to buy, ask your expert.

someday. Someday, your child would become smarter than you

What you didn't expect was that it would happen so soon. To you, computers are a mystery from the future.

But to your children, they are a real source of excitement And they're happening now

THE FIRST FAMILY COMPUTER

So what will this young expert say when you ask which computer to buy? First, make sure that you have sufficient powerforyourneeds. That your computer is easy to learn, and easy to use. And that it has a challenging, entertaining and expanding range of software.

The Dragon 32 is the first computer specifically designed for the family. And as such, we feel that it meets even our young experts stringent criteria.

The Dragon offers a truly massive 32K RAM memory harnessed by the advanced 6809E microprocessor This is quite simply more than you're ever likely to need - but it does mean that your computer's capabilities can respond to

Youknewitwouldhappen | your increasing ability as you | learn your way around.

And how quickly you'll learn. The Dragon's easy-tofollow instruction manual helps. But what will really get you going is the fact that you'll be enjoying every minute.

And when it comes to ease of use, the Dragon's professional-quality keyboard makes your computer as familiar as a typewriter.

SOFTWARE TO MATCH

Dragon software offers a great range of games-but that's not all. You'll find educational programs Programs to help you plan your money. Even programswhichteachyouhow to program.

And whether you're playing or working, you'll be

COLOR BASIC (as standard). Featuring ADVANCED GRAPHICS Iset, line, circle, paint, print, draw. rotate and print using LADVANCED SOUND 5 octaves, 255 tones. AUTOMATIC CASSETTE RECORDER CONTROL FULL **EDITING with INSERT and DELETE**

Higher US interest rates kept the big City institutions on the sidelines yesterday as the equity market opened the second leg of the account on a dull note.

the account on a dull note.

Citybank was the first in the queue with a rise of <sup>1</sup>/<sub>2</sub> a point to 11 per cent after the latest US money supply figures over the weekend. On the foreign exchange, the pound responded with a gain of 0.5 cents to \$1.490\$ cents to \$1.4905.

Gilts also put up a good performance, ending the day on a high note with rises of up to 75p at the longer end of the market in the absence of a new fen, the active ingredient in its "tap" stock being announced by the Bank of England on Friday. The FT Index marked time for much of the day, but closed 1.7 down at 721.3 as Wall Street. opened with a fall of more than

13 points in early trade.

Leading industrials closed mixed with penny gains in Allied-Lyons at 147p, BICC at 230p. GEC at 217p, Marks and Speacer at 198p, P & O G to at 195p, and Tl Group at 162p, in the Irish Sea which continued to dominate sentiment.

Atlantic Resources, which has more than doubled in prior over the past week, leapt a further 97p to 445p. The market Spencer at 198p, P & O d'fd at

Last month's figures mark

of statistics on input and output prices – which use a changed definition of manufacturing industry to exclude oil refining. This has been reclassified as part of an "energy industries"

The change has a big impact on the measurement of input prices because the crude of used by oil refining accounted for a quarter of the index, making it sensitive to move ments in oil prices and the value of sterling against the dollar in which the oil is priced.

Under the old series input prices would have risen by 0.4 per cent last month, reflecting the higher sterling price of crude oil as the pound depreciated against the dollar. The 12-monthly increase would have

Illingworth

takeover

report due

By Jeremy Warner

The long, complicated battle for control of Illingworth Morris, the Yorkshire textiles

group, comes to a head tomorrow when the Monopolies

and Mergers Commission re-

leases its report on a takeover bid by Mr Alan Lewis, a Manchester businessman.

On the stock market, the

up to [20 over the last two

trading days, compared with the 10.25p a share which Mr Lewis

has said is the most he is prepared to pay, and which would give the group a market capitalization of £5.4m.

The board has refused to recommend the offer, But with

Mr Lewis already controlling more than 48 per cent of the shares – and this purchase has

been one of the key issues in the

July money growth is expected to be only half that for June. But the markets will be watching to see if the spurt in bank

# Backpedalling on money supply cycle

prime lending rates of important American banks should not of itself cause anyone to push the panic button in Britain.

The banks tend to follow the money markets in the United States, so in a sense they have merely been catching up. The move had been widely expected and discounted.

But it is one more straw in the wind. United States money market rates offer no relief. Nor did President Reagan's weekend message that the strong dollar was a reflection of growing American economic strength rather than its budgetary

still anxious to cut money costs, have reverted to exchange rate agnosticism in an attempt to avoid

The trouble with this idea is that our domestic economy points conventionally to higher interest rates too. The market's view is

You can borrow money wholesale at 9 per cent for a week, 10 per cent for a quarter, 101/2 per cent for six months ranging up to 113/4 per cent on three-year government debt.

above target point in the same direction in terms of declared government policy. After the June figures, the Chancellor tried to neutralize this with cuts in government borrowing.

figures should reinforce the official line that no interest rate treatment is required.

off or a reversion to the high figures for autumn.

But, even if the Government takes a Micawberish stance on money supply. market forces are perfectly capable of putting interest rates up without any official interference. The trigger may well be the pressure on bank costs rather than their

**Unless Britons suddenly** increase their savings again, there is going to be an increasing scramble for funds as the year progresses. The 114 per cent rise in building society rates to ease mortgage queues was followed by higher returns on competing National Savings.

And the building societies are now licensed to draw £4bn this year from the £11bu certificate of deposit market, hitherto dominated by the banks. So the banks are now facing competition from both ends that must surely drive up

The real problem is that we have not learnt the lessons of 1972-73, that the early stages of recovery in this corntry, partly because they still rest on bousing consumer durables, need an awful lot of money. This inevitably produces a financial cycle, through money supply, higher interest rates or both, that does not fit in with the slower pattern of general economic and investment recovery.

The answer is to attack the root causes. But it may well be too late in the current cycle to start tinkering with credit demand patterns.

The irony is that, if the authorities faced the realities of the cycle they might well decide to stick to an anti-inflationary line and reverse today's policies by supporting sterling. which, in the guise of intervention, automatically curbs the money supply as the Bank of England buys in its own pounds.

### found it against the public he can get Fraser right." Prime rate rises hit Dow

Manchester Ship Canal Company Pretax profit £237,000 (£1.8m loss). Stated earnings 6,3p (49,5p loss) Turnover £11,4m (£11,9m) Share price 155p down 10p

Manchester Ship Canal Company has produced its first pretax profits, after allowing for exceptional items, since 1979. During the six months to June 30 the company achieved a remarkable turnround from losses of £1.8m last time to pretax profits of £237,000.

The turnround was achieved despite allowing for exceptional costs of £1.3m for redundancy payments during the period.

The profits improvement largely from the reduction in costs in the company which has cut its workforce from 2,100 two years ago to 1.600 now in response to falling demand.

But the cuts will continue during the rest of this year to cope with further decreases in demand for the company's SCTVICES

# Bridging loan for IMF likely

European finance ministers and central bankers from the Group of 10 are to meet in five quotas from member countries.

Weeks to consider a bridging Britain was quick to sanction

Britain was quick to sanction loan for the International Monetary Fund worth \$3bn.

If this gets the go-ahead - and the prospects appear to be good it will pave the way for Saudi Arabia to provide another \$3bn on the same terms.

Well-informed sources were anxious yesterday to stress that "this is not some sort of crisis meeting". The money would be made available to cover what is called the IMF's "commitment.

That would provide the IMF

with sufficient funds until it gets which have to be reconciled. the already agreed increase in its. Hence the need for a shortan increase in its quota earlier this year (with the United Kingdom subscription due to

### Brokers expect recovery after \$9bn losses

# Dramatic upturn forecast for steel

By Edward Townsend, Industrial Correspondent

The steel industries of the United States, Europe and Japan are expected to incur totalling \$9bn (£6.08bn) according to forecasts from the New York stockbrokers Paine Webber Mitchell Hutchins.

But the brokers also believe

that after the streamlining implemented by most steel makers, coupled with improvements in the western economies, steel faces a relatively buoyant future up to the end of the century. A dramatic improvement is predicted after the beginning of

the recovery, expected in 1984,

with steel "shortage" - a period when export prices on the world market reach premium levels likely in 1986 or even 1985. A 10 per cent boost in western steel consumption, combined with moderate stock building by users and mills over a six-month period, would push world output to an annual rate of 500 million tonnes and, the

survey says, "blow the lid off

STEEL INDUSTRY LOSSES IN THE FIRST QUARTER OF 1983 by at least 35 per cent compared (Per metric tonne, in US \$, except operating rate West countries, while Japanese steel Japan Germany UK France

It has been a thin year for rent reviews and it is widely expected that the company's accounts, due out next Thursday, will show it following the path of Great Portland Estates, STOCK CONVERSION & INVESTMENT TRUST Share price RELATIVE TO FT/A ALL SHARE INDEX AUG SEP OCT NOV DEC JAN FEB MAR APR MAY JUN JUL

Like Great Portland, a lot of Stock Conversion's properties are West End offices where rents are held back by oversupply, and there is little exposure to the strong market for shop property. Neither is there any cushion from overseas

There was not much zest in the contributions from associate companies either with a rise from £2.8m to £3m, Almost all owned Euston Centre which itself reported a marginal rise from £5.9m to £6.1m.

This year the group is likely to continue to produce steady out undramatic growth of about fl4m - a reasonable target. The shares therefore hold little attraction at present and in particular until details of the year's experiences are published in the accounts.

In the longer term the rate of growth should pick up with rising asset value as the company develops some of the larger sites it has been holding

# International

Signal

International Signal and Control, the American defence electronics group which chose to have its shares listed in London to avoid the Securities and Exchange Commission's tough disclosure rules, can be forgiven for opting for the tender method of raising new money to fund an acquisition. When the company went public last October, the fixed

price offer for sale was 35 times oversubscribed, attracting fl.lbn, lt is no surprise therefore that ISC this time intends to take advange of the demand for its shares by making the offer of 34.6 million shares at a minimum price of

missile propulsion systems company called Marquards. Existing shareholders might

not decide to raise the new as the larget in the City.

issue, thus giving them the benefit of any profits.

The fact that part of the offer consists of existing shares being sold by some of the executives

is only part of the answer. The other problem is that ISC is an American company and the moment that the American public begins to get involved with share offers, either by way of rights or any other method, the SEC will be given cause to seek all the information it wants from the company.

ISC is thus virtually pre-cluded from offering any form of rights to shareholders for fear that American investors might get involved. New offers for ale, in contrast, can carry a restriction on American owner-

There is a good deal of evidence to suggest that ISC shares trade up and down to a much greater extent than British defence stocks with the dollar and Wall Street making them susceptible to any recovery in the pound's value against the

Even so, the acquisition of Marquardt, and the astonishing growth rates achieved by American defence companies still leave a great deal to go for in this offer for sale which looks as though it could achieve a reasonable premium over the minimum price.

Anglo Nordic Holdings, which won control of Braby Leslie earlier this year, is on the takeover trail again. Yesterday 125p each, subject to tender.

Most of the money is to be used to buy a Californian-based against £53,000 last time and indicated that it is hoping to make another acquisition. Weeks Associates, the agriculquestion why the company did tural equipment group, is tipped

# You are now watching BET.

BET has long been a company worth watching. And the past year has been no exception. A new Chairman. A new Managing Director. New members of the Board. And six newly restructured operating divisions which have attracted pre-tax profits of over £70 million from a turnover of £1,178 million. A performance which we hope has pleased our viewers. For the future, our programme will be tuned even more finely. In fact, we have every confidence it will make very good watching.

### As the Chairman, Hugh Dundas, said in his Statement...

BET has traditionally developed its businesses for the long-term, prepared if necessary to accept some temporary sacrifice in profit where, by so doing, it believes it is establishing a sound base for future rewards. That is the reason why we are approaching our 90th birthday in such good

We are now moving into a new era during which we plan not only to capitalise on the Group's well-established core businesses but also, by pursuing the policies of rationalisation and acquisition, to produce a significant and accelerated growth in profits.

### A new era. A new programme

planning

We shall:  $\square$  Reduce the diversity of our operations to focus more sharply on a limited number of business sectors with good potential growth ☐ Speed up the disposal of businesses which have current or expected sub-standard profits and those which do not fit in with our long-term

☐ Make further sales of general investments using the cash to invest in growth sectors of our businesses and to reduce borrowings.

### A sharper focus for the future

The first major move was made in March, when we acquired the 36.1% of Rediffusion ordinary shares we did not already own. The price was high, but we believe it to have been good value for money.

We made a good start with the elimination of loss making and incompatible business. Murphy Bros was disposed of in January. The sale of Canadian Motorways, with its patchy profit record, has been successfully negotiated. And Filmatic

☐ Undertake a more active acquisition programme Laboratories has been sold to its management. On the acquisition front, we have made a number of smaller acquisitions - particularly in the USA -and other moves are under active consideration;

### The last year

Turning now to the hard core of BET's business. the year's results demonstrate the Group's inherent strengths.

There was solid growth in message a datal.

turned in another sparkling perfection and Paul, now well and an in the sparkling down, have taken full advantage of the ap turn in house building and promise an excellent future performance.

1982/3 saw a sharp increase in our oil exploration

expenditure. Our long haul investment in this sector is now very close to pay-off point -with oil from the Maureen field expected to start flowing in October.

### The outlook

This brings me to the immediate outlook. A year ago I said that I was 'fairly confident' that results in 1982/3 would be better than those of the previous year. Although this proved to be true, the increase in profit was a modest one. I expect that the current year's pre-tax profits will climb well away from the plateau upon which they have rested since the onset of the recession. The future looks good.

| Summary of results                             |            |                  |

# Insurers bring in the law to clean

"I doubt whether anyone can put their hand on their heart and say that we will never see a repeat of last year's scandal", said an insider at the Lloyd's of London insurance market last

Tables, there is an are

His concern is echoed throughout the City of London despite a year of dramatic change since a series of scandals involving allegedly fraudulent reunsurance transactions first came to light.

The bad taste which is left after police and Department of Trade investigations into the affairs of Minet Holdings and Alexander Howden, two of the top Lloyd's insurance broking firms, has shaken the belief of even the most fervent advocates of self-regulation as an effective means of controlling huge City institutions such as Lloyd's.

The Lloyd's market has had problems before. After beginning life in a coffee house in the late seventeenth century, the reputation of Lloyd's as a gambling den declined rapidly. important reforms were made in the eighteenth century, and again in the 1920s when the market was the victim of a big

However, the size of the Lloyd's market in 1983 makes self-control risky.

Cash and investment assets held by Lloyd's broking firms total more than £3.5bn, while members of Lloyd's (the names who invest funds through agents in the market) have pledged personal wealth of more than £2.5bn. Lloyd's position as the City's single argest earner of invisible trade carnings remains unchallenged, averaging £630m a year.

Membership of Lloyd's is rising dramatically despite the poor publicity, as individuals rush to share in average returns of about £900 for every £10,000 line of insurance underwitten by Lloyd's, Mr Oliver Carruthers.committee member at the newly merged Association of Members of Lloyd's, which speaks for 1,300 of 21,000 Lloyd's members says that the increase from 6,000 members in 1972 has meant a change in the nature of the market.

"It is no longer a close-knit community" he says.

This year alone more than 1,000 members will enter the market, placing huge demands on the supervisory and control

Mr Carruthers welcomes the changes in the market since the introduction of the 1982 Lloyd's Act last July, and the appointment of Mr Ian Hay Davison, as chief executive of Lloyd's in February. "But what we don't know is how it is all going to pan out", he says.

introduced Lloyd's Act is the creation of a groups set up to consider the governing Council of Lloyd's conclusions of the Fisher which has particular regard for working party report on self-

The new 28-member council adds eight external (non-working) members, three Bank of England approved nominees from outside the market, and the chief executive, to the 16 clected working Lloyd's mem-bers which used to govern the market throught the Committee their tarnished image

Market's policeman, Mr Ian Davison crusades for reforms

The other key provision of the Act is to modernize the selfregulatory procedures which date back to the previous Lloyd's Act of 1871.

to take shape as the 21 task the names whose money is regulation make their rec-invested and at risk within plementation of the proposals to the council.

The aim will be to produce a series of rules either to be drafted as formal by-laws to be enforced by the council, or as a

code of conduct for members. This week one of the first bylaws to be established under the new régime will be published by the council,

This will make it compulsory for underwriters to disclose their interests in insurance companies from October 31. Further by-laws will be pro-The new self-regulatory duced this year to govern reinsurance accounting procedures and controversial requirements of the Lloyd's Act 6 issue separate underwriting and broking activities to prevent conflicts of interest. This will mean big

> The other main change has stemmed directly from the appointment of Mr Davison at a salary of £120,000 a year by the Bank of England. He has been given three to five years to take a grip on the administration of Lloyd's,

firms divesting part of their business before the 1987 dead-

Since his appointment in

the market and help smooth the

introduction of the reforms

demanded by the 1982 AcL

February. Mr Davison has which reduces the number of departments from 17 to seven, each run by one of his appointees and reporting directly to him.

A new committee structure is also awaiting approval by the council which will streamline the process by which it delegates

As part of this process the Investigations Committee was beefed up by adding Mr Davison, legal experts and experienced working members of the market to its ranks.

Mr Davison is also working hard to improve relations with the media. First he aims "to take a lot of the mystery and suspicion away from Lloyd's".

Later he intends to turn this rather defensive strategy into an offensive one aimed at promoting the unique strengths of

This will involve tours to the US, India and the Far East to meet Lloyd's clients. Mr Davison also hopes to become a buccaneer for the British insurance industry in Europe, where restrictive practices pre-vent Lloyd's and the major big British composite insurance companies from winning busi-ness, particularly in West Germany and France.

If he succeeds in breaking down the barriers in Europe, i could pave the way for an end to a traditional dependence on the US market, which still provides 40 per cent of the total Lloyd's premium income.

There will be more unfortunate publicity this autumn when the results of investigations into Minet and Howden are released to the council by the QCs hired to investigate the

There has been considerable embarrassment caused by the news that Lloyd's has reopened its investigations into the Unimar reinsurance organization, which was first investi-gated by Sir Peter Green, the chairman of Lloyd's.

The report of the Investigations Committee is expected o explain whether Sir Peter's inquiry into the affair, which involved a personal friend, Mr Peter Cameron Webb, should have found anything amiss.

The decision to reopen the investigation has led to fresh speculation about the future of Sir Peter as chairman of Lloyd's and the effectiveness of controis. He has yet to decide whether to stand for reelection for a further term as chairman

Many observers argue that Lloyd's needs a fresh face at the top if it is to achieve the new image the Bank of England seeks. Mr Davison denies that he is engaged in a power struggle with Sir Peter.

"He's the chairman, I'm the managing director," is the way be explains their relationship. "I'm not aware of any power struggic," he says.

More critical is the introduc-tion of effective self-regulation measures, Mr Davison says.

"I'm a great believer that selfregulation is the best form of regulation. I want to teach the members of Lloyd's to govern themselves. I think that one of the problems has been that they have lived in a world in which there are no rules and that nov there are rules. They have said lawmakers to make those rules. The lesson they have to learn is that they have to write their own laws."

What remains unclear is whether the introduction of the new measurs can be achieved with a minimum of fuss and without a repeat of the scandals.

### People/Walter Bauer of Informatics

# Thinking vertically

Vertical markets, says Walter
Bauer, will be the next big trend
in computing. "Accountants computer services industry", he

"At the time that was rather a new thought."

Putting an economic value on and lawyers and insurance," he adds, "are three vertical markets we are very much interested in. They are the coming thing in this business," As one of the veterans of

computer software, Bauer's views are worthy of respect. When he says that he is steering his California-based company, Informatics General Corporation, in a particular direction, it is likely to indicate one of the future mainstreams of the

game", he explained in London recently. "If you are a law firm or an accounting firm, and you are putting in a computer for the first time, you look at what software Computers have become like much to differentiate one from the other. It's the software which makes them different."

But when he talks about vertical marketing. Walter Bauer means more than just designing software packages aimed at specific groups of users. The concept embraces a total solution, including softhardware, professional

says.
After more than 30 years working with computers, Bauer

is as excited by developments today as he was in 1951, when he first became involved. "It was a bit of an accident", he Following war service with the US Air Force, he received a

doctorate in mathematics from the University of Michigan. There were only four computers in the United States then. All were being used for air defence or nuclear research, and the university was one of the few places involved in computing.

Bauer began to specialise in the new technology, and helped look at what to expand computer appli-available, cations beyond the laboratory. He was responsible for one of commodities, and there's not the first computer installations to control road traffic in Los Angeles in the early 1960s.

Informatics was formed in 1962, and now ranks as the fifth largest independent software and services company. Revenues in 1982 were \$170m. When the company was formed I felt that software had

intrinsically the same value as

the hardware", Bauer recalls.

Putting an economic value on software was virtually imposs-ible. Up to the mid-1960s every compoter program was written specially for a particular appli-cation, either by the user or by a consultant

Then it occurred to us that one program could serve the needs of several users. Some of my software friends said that would never happen, because people had different requirements and would never accept a uniform product."

In helping to prove them wrong, Walter Bauer has devel-oped a faith in software that nothing can shake.

"If you are interested in try," he comments, "you are probably not interested in the projectors and the cameras, You are interested in the movies. That's the way it is with the computer industry - the software is the interesting part."

Computer Peripherals. Our International Headquarters located close to Heathrow Airport, controls and directs the business activities of operating Companies in 19 countri and distribution operations in a further 60.

on the Importance of business planning in directing our future growth. We are now seeking an exceptional individual capable of formulating and developing detailed product plans for existing and new generation products.

ideally, we seek a science or engineering graduate, preferably with an MBA and a minimum of five years' experience within the computer industry. You will naturally possess the communications skills necessary to present new concepts and ideas to senior management.

Please write with full personal and career details to:

Michael Bradley, Human Resources Manager, MEMOREX INTERNATIONAL LIMITED, Hounslow House, 730 London Road, Hounslow, Middlesex TW3 1PD.

### WALL STREET

New York (NYT) - When the American Stock Exchange and the Chicago Board of Trade last week announced plans to give their members access to each others' stock index futures and options markets, it marked the next to last round in the eventual integration of the securities and futures markets. The last step in the process will involve merging the Securi-

ties and Exchange Commission

What the Amex-Chicago Board joint-access arrangement did was speed up an irreversible process that began with the opening of the financial futures markets in Chicago more than a decade ago, said Mr Thomas A Russo, a partner in the Wall Street law firm of Cadwalader. Wickersham and Taft. That was the first major crack in the thick walls that once separated the securities, commodities and with the Commodity Futures

### Big spurt at Anglo Nordic

By Andrew Cornelius

Angle Nordic Heldings Half-year to 31.5.83 Half-year to 31.3.83
Pretax profit £266,000 (£53,000)
Stated earnings 1.16p (0.40p)
Turnover £20.4m (£5.8m)
Net interim dividend 0.4p
Share price 33½p down ½p
Dividend payable 9.9.83

Pretax profits at Anglo Nordic Holdings, the engineering group which won a full stock market listing in March, have increased fivefold from £53,000 to £266,000 in the six months to May 31. But Mr Brian Wolfson. chairman of the company, stresses that the interim results are not meaningful comparable with the same period last year, when the group was trading on the USM as Anglo Argentine

The latest figures include a first-time contribution from the Braby Leslie businesses which were acquired earlier this year after a bitter £8m takeover

To avoid seasonal disparities in future the board is extending the present financial year until March 31 next, which will ensure that in the future the two halves of the financial year will produce a more even results

# Battle over price of Guinness

By Derek Harris, Commercial Editor

likely to take a new turn soon with consumers standing to gain by a cheaper pint of Guinness's draught stout. This could arise because of possible interpretations of new EEC regulations affecting beer supplies to tenanted pubs.

The battle has already led to one brewing chain stopping sales of Guinness in some outlets and there could be further withdrawals,

Chef and Brewer, which is part of Grand Metropolitan whose main brewing subsidiary is Watney Mann Truman, is dropping sales of draught Guinness in 75 of its near-1,500 pubs and has warned it could stop selling the draught stout in others. Chef and Brewer is unhappy about profit margins on Guinness and wants more

in-pub Guinness promotions. Ind Coope, part of Allied-Lyons, is also asking Guinness about tailor-made promotions.

But the dispute over profit sales of beer in "tied" pubs -

An already-flaring battle of relationship between Guinness the brewers, with Arthur and other brewers.

Guinness and Son under fire, is Company lawyers throughout

the brewery trade are still studying the regulations, intro-duced last month and taking practical effect from the beginning of next year. But a section in the regulations, which ha come to be known as the Guinness clause, appears to ensure Guinness access to any

Bottled Guinness is found on most pub shelves but there are substantial gaps with draught

Under the regulations it looks likely that if a pub tenant wanted to sell draught Guinness his brewe r owner could not stop him. The further suggesbeing sold to the tenant at a higher price than was availabe elsewhere then the tenant could buy from the cheaper source unless his brewer matched the lower terms.

This brings in how Guinness gets to the pub and is priced. The stout is supplied in bulk to a number of brewers which fill margins could soon escalate. kegs, bottles and cans and then New EEC regulations affecting wholesale it on. Guinness in many pubs finishes up at least brewery-owned outlets that are 10p more a pint than the typical tenanted - could change the price of the brewer's own bitter.

# Japan is top customer again

By John Lawless

Japan has regained its position as Britain's biggest market in the Far East after a decline in

imports by Hongkong.

Hongkong overtook Japan as Britain's best customer in the of last year, when it bought British goods worth £331m. In January to May this year, Britain's exports to Hongkong fell back to £284m. Japanese purchases from Britain in the same periods

have risen from £285m to take Japan as Britain's best Far £301m. That marginal rise will East market this year, not offset complaints by British

Bitish exports are affected by trade officials about a two-way trade deficit that is at present more than £2.55bn a year.

The trade officials Far East in the first five months anxious to see whether the of last year, when it bought strenuous efforts by the Japanese Government to force industrial consumers to buy foreign equipment result in increase sales this year, and even more next year.

However, Hongkong over-

shipments made into Hongkong projects such as the new Castle Peak power station and exten-

sion to the Mass transit underground railway. There is also concern that West Germany could take Britain's place as main European supplier to Singapore.

# Has Britain now found an answer to Wang?

### THE WEEK Clive Cookson

As one of the brightest prospects among Britain's home-grown computer companies, mini computers for high speed information Technology Ltd (ITL), has raised £3.4m from five venture capital groups. The new finance should sustain ITL's 50 per cent annual growth rate and help managing director and help managing director. Tony Davies achieve his ambition of making the group Britain's answer to Wang, the immensely successful American CTL's approach to resource different from office automation giant.

Two of the new investors, the Palmer Organisation and Oak Investments, are American and ITL is counting on their connections to provide an entry which it has not yet exploited. But the group remains 70 per cent British-owned.

ITL is little known in the computer industry, despite having a turnover of £18m in 1982/83 and a projected £27m this year. That is because it acts as a parent company, working through three operating subsidiaries: Computer Technology
Ltd (CTL, based in Hemel
Hempstead), Office Technology
Ltd (OTL, Winchester) and
Network Technology Ltd (NTL,

AGDE

CTL is the largest of the

But Tony Davies insists that CTL's approach to resilience is quite different from Tandem and the other American suppliers of nonstop computers. They concentrate on ensuring that the hardware does not fail, he says, while CTL emphasizes software resilience - guaranteeing that a large database remains uncorrupted whatever any of the users do at their terminals. (CTL's software protection technology originated from a secret project to develop a criminal database for Scotland Yard.)

OTL which took over the word processor company Data Recall last year, concentrates on document processing in the widest sense. Its speciality will be office systems that mix text processing with Graphics, voice and data processing.

IT IS ASSUMED THAT YOU MOVE ALLEADY INITIATED REFLACEMENT STOCKS, WITH YOUR AUTOMATIC INDENT: FUNCTION I

NTL the newest and smallest of the trio, is a digital communications company.

Like Wang, it believes that the future of local area networks lies broadband systems which can handle video images, rather than the baseband of Ethernet (the network which comes closest to an industry standard).

.The company's own broadband system uses the same technology as cable television. and it has won an interesting contract from the Department of Industry to develop means for Britain's emerging cable TV systems to communicate with each other, creating a new national communications net-

The three ITL operating companies will work increasingly closely together over the next two or three years, Mr Davies says. The riny corporate management team of five is to be supplemented by a central strategic unit with about ten

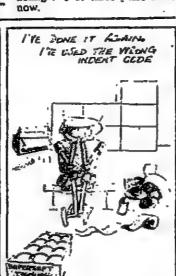

But the process is unlikely to proceed to a full merger of the three units. Mr Davies believes in "swinging the pendulum"

between centralization and decentralization every five years

ITL has concentrated so far in building up strength in the home market. There have been limited exports to Europe but virtually none to the United States, which the management sees as the most promising market in the long term, Mr Davies is certain that a lucrative niche exists there for OTL's document processing systems and for CTL's database protection technology.

Using the contacts provided by the new US investors, ITL is assessing alternative strategies for attacking the American market. Some form of joint venture with an established US company is the most likely approach,
The American involvement

was one major reason why ITL went for more venture capital funding rather than going public on the booming Unlisted Securities Market. Another is that Mr Davies is not yet convinced of the stability of the USM. He would prefer to go straight to a full Stock Exchange listing two or three years from

# The software behind the hard-sell on TV

As teething troubles at TV-AM showed, an independent teleas the advertising revenue it brings in. Attracting an audi-ence is only part of the story: efficiency in booking, handling also essential in the tough world that supplies tomorrow's catchphrases - by reaching the parts that no other medium but

In the case of Yorkshire Television and Tyne Tees Television, it means increased reliance on computers and upon the company which provides sales, marketing and computer services: Link Television, Renamed in January 1982, Link TV evolved from its holding company. Trident Television. Managing director Clive Leach is also director of marketing and sales for Yorkshire TV.

"I'm not a computer man and know very little about them," he admitted. "In my view a computer's sole function 15 to do a job quicker, more casily, and more effectively. I will not have the computer tail

wag the commercial dog."
Despite this, Mr Leach has made some shrewd choices of computer systems which have helped bring in Yorkshire and Tyne Tees' 15 per cent share of the total commercial television revenue, around £110,250,000

for the year ending May 1983. Link TV has a staff of 186 divided between the computer centre in Leeds, which is also the site of transmission, and a sales department in London, with the traffic department in London forming an administrative bridge between the two. All sales executives and their assistants are given fundamental VDU training and Mr Leach has set up a working party to coordinate sales, traffic and DP activities.

The company is moving steadily towards distributed processing and recently expanded its network with 60 terminals from Hylec Microsystems in Oxford, to provide local proces-Oxford, to provide local proces-sing facilities for accounting, the amount of airtime available production financial planning and its price. Each 30-second and word processing tasks. A slot may have up to 10 different mixture of model H4000s and values, according to position H4500s covering both interac- and expected audience.

Clive Leach: computers do the job quicker

tive and smaller, stand-alone Winchester disc-based operation, the terminals are connected into a dual Honeywell DPS 8/44 mainframe system, run-ning under the GCOs operating

Although a variety of appli-cations are run on the Honeywell machines, the most significant is Enterprise, a package from Enterprise Airtime Sys-tems in Thames Ditton, which forms the hub of Link TV's airtime scheduling and accounting operation.

### MARKETING

Originally developed for Thames TV in 1972, Enterprise has been adopted by 13 of the 15 independent television companies and was rewritten two years ago to cater for the introduction of Channel 4.

Advertisements are coded according to product type to avoid clashes between rivals and further checks are made to ensure that the same actors do not appear in juxtaposed programmes and commercials. Most members of Link TV's sales team have terminals to call

### **Hotel Computer System**

BILLINGS, ENQUIRIES, MAILINGS, RESERVATIONS

TELEPHONE: 04868-23956

Modern Business Technology Ltd.

TORCH Business Computers & Office Equipment

The world's leading computer system for weather G5 forecasting. CONTROL DATA

Mr Leach recalls the days before Enterprise was installed 25 "difficult". "We used to have huge boards with breaks laid out on them, and spots had different coloured cards to show their status," he explained.
"Armies of girls used to move
these cards around - sales people were never allowed to louch them, only to look for spaces to sell."

Under the pre-emptive system previously employed, where a booking could be displaced by a more lucrative bid, the computer system gave considerable benfits. Link TV has now changed to a fixedprice tariff to suit the altered economic climate and con-ditions in the advertising

About 10 to 15 years ago, the amount of revenue we took each month amounted to no more than 12-20 per cent of the total, but now it's between 50-70 per cent," said Mr Leach.
"Agencies are also leaving booking until much later, so that where we might once have had £50m worth out of £70m booked at the beginning of the month, we now have perhaps only £35m - this is why we need

Enterprise is only part of Link TV's streamlined operation, because the company has now built a back-end enhancement to carry automation right through to transmission.

Once all commercial slots are booked, usually by midday of the day before transmission, the schedule is frozen and transmission details extracted. A Hytec micro in the transmission area holds a record of all the cassette numbers of commercial recordings, and those required by the schedule are transferred to an Sin floppy disc.

The disc is then input to an automatic cassette player with three play-heads controlling 32 bins of cassettes. Commercial breaks between programmes are of similar duration for the whole country, although the content may vary, so the cassette player in Leeds loads up the recordings listed on the disc for transmission to the Yorkshire and Tyne Tees

Afterwards, the transmission controller amends the schedule according to his records and a final version is produced on a word processor, for distribution to the IBA and the Audience of Great Britain organizations.

flight, the capit stall issue a detailed ticket to each passenger during the flight. Programmable function keys enable attendants to print out meal requirements, accept payment in either dollars or sterling, and pay for headsets and extra baggage. They have been used for ten months on domestic

# Cartridge battle looming

by Martin Hayman Atari UK faces a vicious price

war in the coming pre-Christ-mas period, when sales of home computer har: ware and games seasonal peak. Its own new range of produc s, announced at the recent Chicago Consumer Electronics Show, is still some way from being ready for Commodore has attacked on

the bardware and software fronts, dropping the price of its games cartridges to £10 - one-third of Atari's. Sinclair is shortly to equip its best-selling ZX-Spectrum with a ROM cartridge and games joystick interface to complement its new cheap data storage device, the Microdrive. Competitors like Mattel and Coleco are taking the British market seriously and are selling aggressively priced games machines which can easily be converted by the addition of a storage device and a keyboard into home computers.

Then there are new UK companies like the Pifco-backed Consumer Flectronics, whose intention is to market cut-price peripherals like joysticks and printers imported from the United States and the Far East for Atari and other home

Atari's problem is that it has been simply too successful. It was among the first to spot the potential of "interactive TV" and in 1976 Warner Communications, whose film and record business was already feeling the pinch, bought the idea. So successful was the arcade game, of which Space Invaders is the best example, that in 1981 Atari was contributing around 65 per cent of the group's profits. But in 1982 Atari began to

lose heavily in the US as the craze for arcade games wanted. Buyers expected, and got, home computers from other manufacturers that would run the fast, vivid machine-code graphics that characterise arcade games but unlike the VCS machines could be used for programming too. The coin-in-the-slot craze had also waned when Atari and their associates Williams failed to come up with "hit" games of the quality of Invaders, Pac-Man and Defender.

Atari's initial success in Britain was founded on the quality of its VCS games machines, which were sold through Ingersoil. But when cutting Trans-Altantic airline, is serious business to be done in leading other airlines with handheld portable computers as in-flight ticket machines. With more than aight Sharp portables to the country of the count found itself up against Gerald Ronson, boss of the Heron Sharp portables to each Ronson, boss of the Heron the cabin staff issue a Group who controlled Ingersoil. and who extracted a swingeing \$21m.

Atari set up the new com-pany, bringing in Clark from Rank Xerox and Eric Salamon from Mars as marketing director. The new men are optimistic routes and are seen as a major tor. The new men are optimistic cost saving operation by abolishing that the games business will turn profitable again this year.

By Geoffrey Ellis

The building, hidden deep in the Worcestershire countryside is approached through remote controlled video monitored gates set in a high security fence. Once inside, access to sensitive areas is by a system of electronic key cards that would not disgrace the Pentagon. It is the nerve centre of the British motor industry, the computer centre of British Leyland Systems Ltd. (BLSL). At the very centre of the building is a 12,000 square foot computer room where more than £14m of hardware purts away processing some of the thousand million characters of company data, without which most of BL would rapidiy come to a heit.

BLSL a wholly owned subsidiary of BL was set up in 1979 under the management of Sir Michael Edwardes, to market the expertise gained in its primary role of providing technological support to the parent company. As with so many companies. BL first moved into compating through processing pay rolls and accounts, and a plant by plant piecemeal operation prevailed. This was rationalized by the opening of the new centre, and it now provides

Support for more than 45 BL plants.

Mr Chris Chiles, director of Computer and Communications Services, is aiming his sales at the manufacturing and distributive industries, and has Fords among his clients.

As the only private operator of a micro wave link in Europe, BLSL provides the largest

privately owned communications network in the country, carrying voice, data, text and graphics signals. The company is offering its Comet electronic mail service and ViewShare, a viewdata system – and signed Sony as its first major customer within days of receiving a licence to operate a network for data transmission.

There are just over 500 BL dealers on line to ViewShare, with that figure expected to double in the next year. By using the link they are able to locate a specific car for a customer within 30 seconds, and by abolishing much of the paperwork the error rate in claims for warrantee reimbursement has dropped from 15 per cent to only 2 per cent.

Another of the successful packages originally designed to smooth the workflow on the Metro production line is ideally suited to spot potential bottlenecks in production at an early stage of planning a new factory. This "see why" package, using interactive simulation and modelling has managed to give a large chemical company an amazing 40 per cent increase in production in just one plant. With these and a large number of other

products developed in the day-to-day running of a giant manufacturing operation. Mr Chiles is confident of the growing power of the company.
With a lengthening list of blue chip clients and turnover approaching £30m his optimism seems

JOB SCENE

# Not easy for Tops

By Richard Sharpe

While crystal ball gazers in the computer industry insist that the days of the humble programmer are numbered many computer users still find it hard to get the right people.

In the long term the program-mer must disappear. But now jobs remain to be done in the central data processing depart-ments of thousands of UK

Britain has a reputation for exporting its software talent. Major US banks, Middle East oil companies and continental European engineering groups turned to UK recruitment agencies when they were stuck for programming people. This may now be changing as freelance Hungarian programmers come onto the market.

The Hungarians, so their promoters say, are talented programmers who, if not used to working with the very latest hardware, are experienced in routine applications that take up a lot of today's computing

The Hungarians are coming onto the market just as the Tops training scheme is undergoing an overhaul. Tops courses were one of the main ways people got into the computer industry, breaking the circle that em-ployers wanted staff with experience but were unwilling or unable to train them.

Today, the number of people who can find employment after a Tops course in the computer industry is falling, despite the excellent quality of much of the

fraining.
Fewer than half of those who took courses during the academic year 1981/2 had a job after three months, a recent report into the Tops scheme said. This compares with 79 per cent being placed within three months in 1979/80.

Some of this is due to the slowdown in the growth of programmers and in the numpers of operators. But it must also reflect on the course itself, or more properly, the courses, because Tops is not a single course in computer skills but a number of them run by different operations with differ-ent course contents.

A degree of standardization is called for so that the quality of training can be guaranteed, and in this way the Manpower Services Commission hopes to make graduates of the course more attractive to employers.

The key question is whether standardised courses to a higher level than now included in Tops will be able to break the circle of

no experience-no job.

The Hungarians have the advantage experienced. As their reputation is made their credability will be built up, making them more attractive for other data proces-

Lessons for cricket and football in the gridiron game

# What American way of sporting life would do for Britain

I remember when I was at kicks. Their total involvement Lord's in the company of an in the game is no more than a ambiable but intolerant gentleman, watching England getting whacked by the West Indies. At the end, with the predictable pitch invasion at its height, he turned to me and said: "Look at it - the sacred turf is covered in

I don't know what he would have said last Saturday when Art Plunkett, Craig Puki, Tootie Robbins and all their pals from St Louis Cardinals collided so thunderously with the Minne-sota Vikings in the American football match at Wembley Stadium. It was a fortnight and statum. It was a fortught and a million light years away from the Charity Shield match between Liverpool and Manchester United.

Initial remarks that this seemed to be a game of chess played with epsilon semi-morous instead of chess pieces did not go down well in a press box stuffed with enthusiasts and connoisseurs, so I was forced to keep silent and allow the delights of this genuinely beautiful game to make them-

### Grim faces

Up in this glass-fronted eyric, a pair of borrowed race glasses in my hand, I could see the grim faces behind the helmets, could even see the fips of the quarterback move, apparently, I am informed, saying such Delphic things as "59-red-blue-hud" I could even see the fips of the Vikings moving as "The Star-Spangled Banner" was played before the match. My informant told me they had been practiced.

It is a lovely game, at least for the speciator, and one cannot fail to be impressed by the American way of specialization. We Brits revel in the amateur approach even among people who get paid for playing. In the gridiron game, you get good at one thing, you stay good and you draw your pay. General allround competence is anathema. Each team includes an entire teamiet of it men whose

A kicker has an even easier life, sauntering out to kick a ball once every hour or so. Perhaps our brave boys who went to New Zealand would have profited under such a system.

### Different teams

There are also completely different teams for the tasks of attack and defence. This would be an intriguing innovation in the Football League: clubs could amalgamate and become unbeatable. Imagine playing Luton's first 11 when the ball crossed the halfway line and every time it came back into your own half, switching to 11 men from another club, But I have promised to give up Arsenal jokes.

The woes of the England selectors could be cancelled at a stroke under such a system. With a line-up of 20 or more bowlers, you would have a man for every occasion, with a dozen and more batsmen of varying styles. That true specialist, Bob Taylor, would hold his England place until he was 90, all batting worries cast

You could have various fielding sides, a band of nine fleet-footed Derek Randalls for saving runs, a gang of toffee-fingered catchers for more aggressive moments. The only drawback is that we would lose the joys of watching Bob Willis bat; as a bowler, he is in a select group of the greatest; but as a batsman he is unique.

The rhythms of the gridiron game are somewhat alien. The me involves a great deal of hanging about, with much running on and off the pitch. The fact that the uniforms make every player appear identical adds a further factor of baffle-

Before anything can happen, the two groups of players actually about to do something hold rival prayer meetings a few yards apart. Then each player takes a different pose and holds function is solely to receive it, like an over-conscientious

Training is a yawn: Bon Bon, a Viking without a belmet

mime student, and then we kind of service at Tooting and have all this red-blue-hut

There follows about five seconds of action, like mimes performing some drama called Anthill poked with stick, and then perhaps by prearranged signal, everybody falls over. It is like ring-a-ring-a-roses. If the spectator has worked out where the ball is, let alone how it got there and why, he is doing rather well.

### Game analysis

All is made clear when a kind fellow gives the journalists a duplicated sheet carrying a move-by-move analysis of the game, a great American custom. It tells you all you could possibly wish to know: "Ted Brown 1st down 5 yd gain. Ran oob." Or "Lish is sacked by Hart and Ashley at the 23, 4yd loss". They don't provide that

Mitcham FC. But like the game of football,

as we know it, gridiron has those moments of sudden explosion, moments when the game leaps from the pedestrian to the exalted, moments when all the 59-red-blue-but works, and sheer inspiration is added to the mixture, the forward pass soaring from the case of milling giants, the ecstatic moment as the wide receiver clings on to the impossible ball in the teeth of a band of murderous ruffiars in the wrong-coloured shirts, and you are in the wholly familiar territory of sheer joy.

and you remember what sport is all about again. There is untramelled delight to be taken in such specialized excellence. But I would hate to be deprived of Bob Willis's

Simon Barnes

### FOOTBALL

# Campbell reunion at Derby

Peter Taylor has paid some of his own money to buy the Bradford City centre forward, Bobby Cam-pbell, from Bradford City. Derby County could not afford the full £70,000 for for the Northern Ireland international so Taylor and his management team made an interest-free loan to the club. Campbell will therefore re-join the former Bradford manager, Roy McFarland, at Derby.

former Bradford manager, Roy McFarland, at Derby.

The Zimbabwe antional team have arrived in Britain for a two-week tour, during which they will play Derby County, Carlisle United, Port Vale and Coventry City. Coventry toured Zimbabwe earlier this year, beating the national team 5-2 and winning three of five matches against club sides.

West Bromwich Albion have been quoted a fee of £175,000 for the Aston Villa centre half, "Ken McNaught, who has turned down the offer of a new two-year contract. Ron Wylie, who has turned down the offer of a new two-year contract. Ron Wylie, the Albion manager is seeking a replacement for: John Wylie, who is now player-manager at Peterborough.

Chelsea's unsettled midfield player, Mike Fillery, has promised to let Coventry City know today whether be has decided to sign for them, He has agreed terms with the Coventry manager, Bobby Gould, but talleed to two other first division clubs, including, Queen's Park. Raneers at the werehead

but talked to two other first division clubs, including. Queen's Park. Rangers, at the weekend.

Tommy Taylor, the former West Ham and Orient central defender, is to join Charlton Athletic as player-coach. Charlton are the subject of a transfer embargo which prevents them from buying players, but Taylor is a free agent after leaving the Belgian club, Beerschot. He will be responsibile mainly for the reserve team at the Valley but be will be available for first team duty if required.

· Liverpool have competed the signing of the goalkeeper. Bob Bolder, from Shetheld Wednesday Bolder, from Sheffield Wednesday (£150,000) and the centre forward Mike Robinson, from Brighton (£250,000).

Southend United have signed Steve Collins, a defender or midfield player, from Peterborough and Greg Shepherd, a forward, from Norwich.

 The Welsh International wings Alan Davis, will be out of the Manchesser United side for at least three months after breaking his left ankle in a pre-sesson friendly against Stanford of the United Counties League.

Milwall have cancelled next Saturday's friendly game at Maid-stone on police advice. The decision follows the brouble in Milwall's match has Saturday at Tonbridge when the refereo, Graham Crafter, when the reserve, Granam Crauce, took both teams off midway through the first half owing to a fight on the pitch involving about 100 tecnagers. Millwall blamed "so-called fans from another League

# £70,000 | A cub called Sutton follows the tracks of the Golden Bear

Los Angeles (Reuter) - Hall Summ has taken the first step towards the superstar status enjoyed by Jack Nicklaus and Tom Watson by winning a big tournament in only his second seaon.

Nicklaus, who failed by one stroke to catch Sunton in yesterday's climax in the US PGA Charmion.

stroke to catch Sunton in yesterday's climax to the US PGA Championship, had no doubt his young rival was on the way to a successful career. "Hat, Congratulations," the "Golden Bear" said after watching Sutton tap in a four-inch putt that gave him the title at the Riviera Country Club. "That"ll be the first of many for you."

Sutton, who led from start to finish, at one time built up a five-stroke lead then saw it dwindle to one as he tried to play conservative-

stroke lead then saw it dwindle to one as he tried to play conservative. Iy and only succeeded in dropping a stroke on three successive holes. However, he steadied himself and had pers for the last form.

Needing a par at the formidable 447-yard, last to avoid a play-off with Nicklaus, Sutton sent a low drive soaring over a ridge and into the fairway, then smacked a five-iron 15 feet below the hole for an easy two-putt. That gave him a 71 easy two-putt. That gave him a 71 for the day and a 10-under-par total of 274.

of 274.
Suton's closest challenger was not, as expected, Ben Crenshaw, who fell away, but Nicklaus and the tour comedian, Peter Jacobsen.
Nicklaus closed with a 66 for a 275 total, while Iscobern was just one more adrift after a 65 in which he had seven birdies in the first 12 boles. Sutton, th: 25-year-old son of an

oil million re in Shreveport, Louisiana, has compiled a record in his first two years as a professional that bears con varison with that of

Nicklais.

Bofore joining the tour he won a
U.S. amateur title, against tow for
Nicklaus, and in his first year as a
professional was named "Rookie of the year". His 1982 earnings of \$237,434 set a record for a fist-year

### Reality is a pale shadow of illusion

nothing but a buzz of hackle on a bare long-shank No 10 hook. Peter Deane had it from him in 1950.

"At first I didn't like to use it."
Desne told me this week. "Held in
the hand, it looks nothing like the

"I N my opinion this is where most Americans have gone wrong in their fly designs. Their fles look like

do with exact imitation

The mayfly season this year has been good. Some stretches of the Test have had prolific hatches. The hatch was delayed a little compared with last year but when it did come the may be the said of the maded in towards the end of the period it came with a bang. When I was fishing at Timsbury, the fly were up all day from 11 in the morning until

seven at night when they were mixing with the spent.

One noticeable point about the fishing was the changed attitude of the rods towards the patterns of the fly they used. A decade or so ago you would expert most of them you would expect most of them to bave on a French Partidge, if not then a Straddlebug, or one of Hammond's favourities. All these patterns now seem to be very much real thing, but on the water it is quite different. I think its success must be in the way that it casts a shadow on the water. It creates the littesion of a fly, it is nothing at all to do with event injustion.

in a minority. Some were even missing altogether. Admittedly I saw one French Partridge take a good fish but that was all. For the rest it was a matter of either the Grey Walff or the Shadow Mayily. The remarkable

models of the natural fly mounted on a hook. They concentrate on making copies of wings and legs, and eyes and having their bodies with one colour on the top and modier underneath. All this is wrong. A fly must create illusions of reality. That is the secret." meither look to us at all like the real mayfly. This is not altogether surprising when it is realised that they are not intended to look like a mayfly to us, only to the trout
The Wuiff is well known. Peter
Deane's Shadow Came from J.
Arthur Palethorpe, of Hungerlood
Priory, who used it most successfuly
on the Kenner. It was more of less

Coe said from his home

yesterday that he would gladly

consider going for analysis by Martin, with whom he has had

previous discussions, depending

on the outcome of his present tests in England. He has already

is my game,

What is exercising the minds England, where qualifications of not a few specialitis here at are traditionally outstanding the world champpionships is a What we might be able to tell conundrum which is fundamen- Seb better than they can is how ral to further improvement in he compares with other elite middle and long-distance running how does the exceptionally fit athlete who is normally abnormal know how to read the signs which might tell him he is sbnormally abnormal, or in his terms no longer normal?
The 5,000 metres heats will

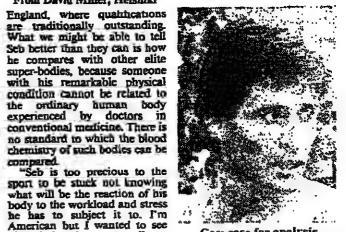

take place tomorrow without the world record holder, Dave Moorcroft. In the 10,000 metres final tonight Alberto Salazar, of the United States, fifth fastest ever behind Rono, Mamede, Lopes and Schildhauer - the last three the favourites tonight with Cova, Shahanga and Kunze - has almost no chance of a medal having scraped through with the last qualifying

He inadvisedly ran in the Rotterdam marathon in the spring for reasons best known between himself and the promoter and has never properly recovered, suffering recently from respiratory problems.

Most conspicuous of all, tonight's 800 metres final will be without Sebastian Coe, who has run the distance almost two and a half seconds or some 19 metres faster than anyone taking part but is sitting forlornly at home watching television in none of these three cases and many more besides can anyone be sure why: but an American here studying performances and individual physiological characteristics thinks that he has at least a chance of coming to the right

David Martin is an exercise physiologist with seven years qualifications for his position as lecturer at a hospital in Atlanta, where he runs an analysis clinic for some of the top runners in the US, including Tom Byers, Craig Virgin and Julie Brown, It is his responsibility to conduct, on behalf of the US Olympic Committee, long-term monitor- from ing over several years of here". distance-running physiology, an area which, it is now obvious, holds the key to sustaining the demands of intensive training programmes.

He told me yesterday: "We don't necessarily have superior knowledge to the medical said he will not run again to defeat Cruz, people looking after Seb in internationally unless he can year behind Coe

form. Medical analysis is more likely to hold the answer than some of the wild speculation that has been flying about here

women at this level are the over the past few days.

There has been a strange But he does claim: "What we among some other athletes and do have expectation of doing is coaches, suggesting all manner from the knowledge of his past other coaches such as John Allen, made without any knowphysiological history, that he is before he actually cracks up. It's a fine line. The reason we have ledge of the training pattern or diary which has brought Coe his not published anything yet is past sucesses.

After last night's semi-finals of the 800 metres there can be fittle doubt that the champion will be Joaquim Cruz, the tall, loping Brazilian, who won in Imin 45.62sec after easing up over most of the last 50 metres. His huge stride eats up the ground and though he gives no impression of sharp, basic speed, he can respond to any challenge thrown at him apparently without much effort. Robinson had to fight hard to take second qualifying place behind Cruz, ahead of Dupont (France) and Kalinkin (Soviet

Garry Cook was at the shoulder of the leaders, Koskei (Kenya) and Guimares (Brazil) for a lap but from third at the bell he faded to sixth, with Wulbeck coming through hard on the outside down the straight to win in 1min 46.21sec. But I do not think the experienced German or his compatriot Ferner, the European champion, who took the third heat in Imin 45.24sec, bave it in them to defeat Cruz, fastest of the

Juantorena: "Maybe I would have broken my foot at home."

### Grants to be withheld for a year

By Ian Mackenzie The Scottish Sports Council have to be scound sports Council have stopped awarding grants to amateur sports clubs to help towards the cost of projects such as improved playing facilities, extra priches and new club rooms. After 12 years and expenditure of more than £4m, the Council has said money is no longer available. Officially the moratorium covers the next 12 months, but it is likely to last much longer.

In Edinburgh vesterday Mr Ken Hunchinson, the chief executive; said the Council faced "serious financial difficulties" in its capital grants scheme. The supply of finds had dwindled while demand had dwindled while demand continued to increase. The decision had been taken "with deep regret,"but there had been no

"There have been delays in implementing projects which were offered aid in previous years, and to which we were committed, he said. "Many of these are now going aboad and making a concerted demand on the budget. There was a further commitment in the first half of this year, and the problem has been compounded by still more cuts in our grant-in-aid.

"I lules additional finals become Unless additional funds become

evailable, and that is an increasingly remote possibility, no futher offers can be made; although we shall honour payments on projects aready "The consequences of all this is that for the next year or so we shall not be considering any new applications for grants.

Mr Hutchinson said it was impossible to forecast when the scheme Los Angeles prepares for largest Games

CHELTENHAM, Glamorgan, with nine second innings wickets in hand, are 125 runs behind Gloucestershire.

John Childs, the Gloucestershire left arm spinner, took five for 77 and Glamorgan had to follow on 172 behind. By the close Glamor-gan, on 47 for one, still needed 125 to make Gloucestershire bat again.

Ontong, however, saved them from a rout, hitting 12 boundaries including two sixes, in 81 in the first innings and is unbeaten on 22 in the

Snepherd took two wickets in Glamorgan's first innings, held two catches and missed out by two runs on his third century of the summer. Sainsbury helped him put on 48 for the last wicket before being bowled with Gloucestershire on 376.

John Shepherd, the Gloucestershire all rounder, was left unbeaten on 98 when the innings closed for 376 against Glamorgan, Gloucester-shire, 329 for nine on Saturday, decided to but on and 47 runs came in even time before Sainsbury was howled by Selvey for 13.

Shepherd, who had begun on 67, hit five boundaries taking his total to 12. Selves had to send for the new ball to dislodge the final pair.

Glamorgan made a lively reply with Hopkins and Francis taking 12 runs in the first two overs, but soon
after Hopkins was out when going
for a cut off Shepherd and fallingto a
fine, tumbling catch at cover by

Francis was also out before lunch erancis was also out before lunch. With the total on 35 he tried to withdraw his bat from a short ball from Sainsbury but it flew off the edge to Zaheer at second slip. At lunch Glamorgan on 46 for two off 25 overs were still 330 behind Gloucestershim.

### Butcher's best suits Leicester

LEICESTER: Leicestershire. with seven second innings wickets in hand, are 226 runs uhead of Nottinghamshire.

A career-best 130 not out from Butcher, the Leicestershire opener, but his side in complete against Nottinghamshire. Butcher, aged 21, who was only third choice behind Cobb and Boon as an opening partner for the experienced Balderstone at the start of the season, began his innings in dramatic style with seven boundaries in as many strokes. He collected 76 of his

chanceless 162-minute century in boundaries. Butcher steered Leicestershire to a lead of 226. Earlier Nottinghamshire had escaped after being 10 for five thanks to Leicestershire's erratic bowlers. Taylor emerged with four for 29 from 24 overs, but

the others gave away 45 extras.
Nottinghamshire's young wicket keeper. French, made a season's best 59 as Nottinghamshire were allowed to get within 14 runs of Leicestershire's first innings score of 226.

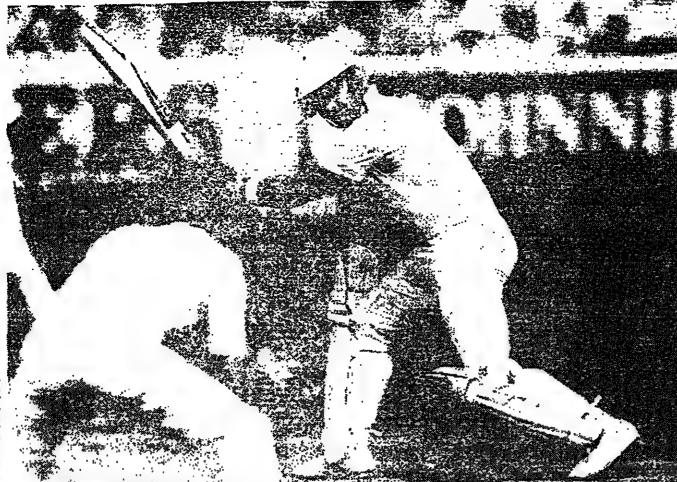

Gower collected a pair in his final outing before the Lord's Test when he was leg before for the second time in the match. Davison went second ball as Saxelby picked up three important wickets in the space of two overs to leave Leicestershire at 74 or three. But they finished on 212 for three, thanks to Butcher.

MINOR COUNTIES TABLE

# Quick win cuts vital practice

By Richard Streeton BOURNEMOUTH: The New Zealanders beat Hampshire by nine wickets.

Three successive fours by Jeff Crowe against Nicholas completed victory with a flourish for the New Zealanders yesterday. It took the touring team only 45 minutes to score the 60 runs they needed before they returned to London to prepare for the second Test match at

Lord's on Thursday. Even the New Zealanders had mixed feelings about the early finish on another day of glorious sunshine. Their itinerary has hardly been well endowed with three day fixtures and for the sake of practice they would have liked to have been extended more in this match. Hampshire's second innings failure on Sunday, though, precluded this.

Crowe, whose Test place is in jeopardy, was promoted when Edgar was leg before to Nicholas as he went to drive, Crowe struck the ball positively and finished the match with two leg side boundaries and another through the covers. Franklin, tail and lean, once again confirmed his long-term promise. For older watchers there was a hint of Walter Hadlee aiming at about his upright, straight

### Kent and Tavaré fall short

CANTERBURY: Worcester-shire, with all second innings wickets in hand, are 100 runs altead of Kent.

The Kent captain, Chris Tavare, dominated his side's innings against Worcestershire at Canterbury yesterday when he batted for 261 minutes and hit eight fours before being dismissed when he was seven short of his century. Even so Kent were all out for 276 - 100 runs behind Worcestershire.

After Woolmer had been run out in the third over, Tavaré and Benson, who passed 50 for the fifth time in his last seven innings, added 107 off 37 overs for the second wicket before Benson was out for 53. Graeme Fowler, who pulled a

Worcestershire's spinner, Illingworth, bowled his first 24 overs, taking two for 63 as Kent had to fight for their runs on a pitch giving some help to spin. Tavare was seventh out at 243 in the eightyeighth over with Kent baving then passed the 227 they needed to avoid the follow-on.

Illingworth finished with four for 86 in 39 overs. But his performance had been surpassed by Underwood who was the best of Kent's bowlers. His figures were seven for 103 in 44.4 overs.

Worcestershire's total had owed a lot to Curtis (84) and Inchmore (41) who had made their eighth wicket stand worth 70 off 21 overs. Curtis, in his first championship game of the season, batted 256 minutes

# Holt has whip hand with Deputy Head

Deputy Head landed the E12,000 added Northumberland Sprint Trophy Handical at Newcastle yesterday and made it third time lucky for his trainer, Jack Holt, at the course.

"That's my first here from three runners", Holt said. "My other two were only just beaten - Epsom Imp failed to land the Gosforth Park Cup by a shorthead while Tinjar was beaten two short-heads in this race two years ago.

Richard Fox did well to get Deputy Head home by half a length from Coquito's Friend. He was forced to switch his whip hand several times in the closing stages. He lost his reins half a furlong out, but gathered them up again and once he struck the front inside the final furlong Deputy Head battled on well,

"It was in the last half furlong that the reins were torn out of my hands," Fox said. "Deputy Head appeared to make a false step at the

time."

Holt, who made the 500-mile round trip from Basingstoke, brought Deputy Head for 7,500 guineas at the Newarket Sales.

Autumn Sunset, who was made 5-4 favourite, was ridden by Mark Birch because Walter Swinburn was not feeling use!!

because water Swindin was not feeling well.

Jack Berry, the leading northern trainer this season, had some sharp words to say when his Fleet Builder could finish only runner-up to farourite Singleman in the Opening Thropton Maiden Stakes.

"The stewards are being 100 tough, My boy Steve Horsfall had a tough. My boy Sieve Horsaal had a chance to go for a gap out there, but what is going to happen if it closs on him?" Berry warned: "You won't get any good jockey riding in races soon if this keeps up. At the moment the stewards want lockeys to sound horns on their horses if

they are going to overtake."
At Windsor On Edge continued to fly the flag for racing's bargain basement when scoring a 12th success since being bought by the Alcester trainer, John Spearing, for 1,700 guineus at Doncaster Sales. The eight-year-old made all the running in the Racecourse Roma-bout Handicap to complete a double for Philip Robinson, who also won

on Pichincha.

Spearing said: "On Edge was bought as a three-year-old and we tried him as a hudler, but he didnt take to it. Although his best trip is a mile he could go for the Midlands Cambridgeshire at Wolverhampton over one mile and furloss." over one mile and furlong – a race he won in 1981." The grey was the third winner of the season for Spearing from his 16-strong flag

Cook drops appeal

Paul Cook has decided not to appeal against his eight-day suspension imposed by the Ayr stewards for careless riding. A Jockey Club spokesman said that Cook had withdrawn the appeal after his solicitor viewed the film of the Ayr race when Cook finished third on Annan Magic in the Auchendrane Selling Handicap, Cook's ban runs from this Thursday to August 18 which rules him out of next week's which rules him out of next week's three-day York Ebor meeting.

Prix Morny at Deauville on August

The awesome strength of Henry Ceil's large band of two-year-olds will be underlined still further at Newcastle today if Millbow wins the group three Seaton Delaval Stakes. While the disappointment must be great that he has failled to win a race of any description so far this space. On paper you would expect Precocious to live up to his name and be as fast as he is, but not necessarily Vacarme. Precocious is by Munimy's Per a first horse and a bugely successful are of fast horses. As if there is not sufficient speed on that side of his pedigree Precocious also Reform, Whistlen and Whistlen an of any description so far this season with Diesis, Dunbeath and The that side of his pedigree Precocious also Reform, Whistlen and Whistlen and Whistlen and Whistlen and Whistlening Wind all close up in his female family. Fort, who all featured prominently in the top 10 of last year's Free Handicap, the consolation is that he

extremely valuable prizes at stake.
What excites me about Vacarme is
the speed that he has shown in his
two races.

Draw: No advantage

mg Wind all close up in his fearate master of Warren Place has galloped this year. At this stage of the season it would be surprising if he came up otally different background. By with a better one, simply because a horse with speed will have shown introduced to a mile and a quarter he is not, of a mare by Sedium whose totally different background. By
Lynhard, who excelled from seven
furlongs to a mile and a quarter he is
out of a mare by Sodium, whose
principle claim to fame was those
victories in the Irish Derby and St
Lease in 1966. has an abundance of promising Some will say that that is only to be expected when a stable houses as many as a hundred two-year-olds, yet, as other trainers with large strings will concede, it is not all plain sailing with all the things that plain salling with all the things that can go wrong, quite apart from immaturity and breeding.

Vacarme, Precocious, Defecting Dancer, Keen, Trojan Fen and Millbow make an imposing short list with which Cecil can now go to town in the second half of the season when there are some externely valuable wires at cake.

Leger in 1966.
Virunga, the mare in question was placed behind Allez France and Dahlia in the Prix de Diane and the Prix St. Alary besides winning three good races berself. When a horse with that sort of middle distance vacarme has fremember that he lowered the six furlong course record on his debut at Ascot by more than a second) then the omens are favourable to put it mildly. And that is why I have already pencilled

Varcarme's name in my notebook who not long ago, best Bill as a possible winner of next year's O'Gorman's English challenger, 2,000 Guineas: Superlative, in the Prix Robert Papin. France's first important race George Robinson, our immensely experienced Newmarket correspon-dent, who watches most of Henry of the season for two-year-olds. It was Superlative who stock his head out in the gamest of manners to thwart Kalim's attempt to win the July Stakes at Newmarket at the headers of July beginning of July.

مكذامن الأصل

THE TIMES TUESDAY AUGUST 9 1983

The way that Kalim finished that day suggestyed that he was crying out for seven furlongs which is precisely what will confront him at Newastle today. But not even he should manage to give 3lb to Millbow, especially if Millbrow is as good as Robinson thinks he is.

Millbrow started at 3-1 on for his first race at Doncaster which suggested that both Ceril and Lester Piggot considered that it would be a mere formality. As things worked out they were in for a surprise because Millbrow was beaten three 21 it will be interesting to see how Millbow fares against Kalium at Newcastle today. If present plans are adhered to Cecil will run the Windsor Castle Stakes winner, Defecting Dancer, in the hig two-remodel event at Desuville where quarters of a length by Quick Work. However with the benefit of hindsight that race was something year-old event at Deauville where he will encounter among others, Masarika, the Aga Khan's fast filly what one might expect to encounter on a Friday evening at Doncaster.

Quick Work, the winner, has remained unbeaten, while of those who finished behind Millbow, On Oath, Harvard and Persis have all won since. So, too, has Millbow who bolted home in his next race by five lengths at Yarmouth.

Newcastle, may have to make do with winning the Wansbeck Stakes instead with Water Moccasin, who won his last race in a hack canter

Lester Piggott has been booked to ride Dick Hern's Moroon in the group two Prix de la Cote Normande at Deauville next

Dick Hern's Band has been heavily supported with Hills for next Wednesday's Tote Exor Handicap and is now clear favouring at 6-1. Abdonn is 7-1.

**TENNIS** 

### Greats of the future

Indianapolis, Indianna (AP) With their victories in the seventy With their victories in the seventyfourth United States open clay court
championships. teenagers Andrea
Temesvari, of Hungary, and Jimmy
Arias, of the United States, have
proved they are leading the new
generation of tennis players.

Arias, who will be 19 next week,
came back to triumph over Andres
Gomez, of Ecquador, in Sunday's
two and a half hour match. The
speed of Gomez's serve had Arias in
trouble frequently. But the Ameri-

trouble frequently. But the Ameri-can eventually won 6-4, 2-6, 6-4 after losing three of the first four games in the final set.

Temesvari, aged 17, defeated
Zina Garrison, of the United States, Nashville, Tennessee (AP) – After being defeated by Guillermo Vilas, of Argentina, 6-3, 3-6, 7-6, in an exhibition game here on Saturday, John McEnroe, again gave his support to Vilas's struggle with the Men's International Professional

Tennis Council (MIPTC). The council has elected that Vilas accepted appearance money to play in a recent Dutch tournament. Vilas has denied this and he was being nade a scapegoat by MIPTC.

McEnroe said: "He (Vilas) says he didn't take the money and, even if he did, it's very unfair. If they (tournament sponsors) choose to give a player some money, that's their business. It's a fact that certain

OColumbus, Ohio (AFP) - Brian Teacher, of the United States, won the Columbus Grand Prix tourna-ment here when he beat his compatriot, Bill Scanlon, 7-6, 6-4 on Sunday. Teacher, aged 28, who collected a prize of \$20,000 had previously won the event in 1978.

### Closing the gap

By Lewine Mair

In an attempt to close the gap tennis, the LTA have chosen four boys to attend a new training school which will start next month at the

Abbey.
At 13, Ulrich Nganga is the oldest of the quartet. The others, all 12 years old, are, Colin Beecher, David Harris and Nicholas Smith.
The hour will attend local schools.

experience to bear in keeping an eye on the boys' education and will also assist Clifton with the tennis.

Bone believes the new set-up which is similar to that already operating in France, should bring the standard of British tennis close Law Report August 9 1983

### Council under no duty to owner in breach

Governors of the Peabody Donation Fund v Sir Lindsay Parkinson & Co Ltd and Others Before Lord Justice Lawton. Lord Justice Fox and Lord Justice Stade

[Judgment delivered July 29] A local authority which dis-covered that a site owner, who had obtained approval for a satisfactory drainage system for a housing development, was installing an unsatisfactory system in breach of specific statutory requirements were not under a duty to that owner to exercise their powers to enforce the owner's compliance with the

The Court of Appeal so held in allowing an appeal by the third defendants, Lambeth London Borough Council, from the order of Judge Oddie on March 18, 1983, whereby it was declared that the plaintiffs, Governors of the Peabody Donation Fund, were entitled to the Donation Fund, were entitled to the payment of damages from the third defendants representing such part of the sums for which the plaintiffs were liable to the first defendants, Sir Lindsay Parkinson & Co. Ltd. out of the failure of the rigid drainage system installed at Knight's Hill, Lambeth.

Mr John Owen, QC and Mr Richard Fernyhough for the local authority, Mr John Dyson, QC and Mr Stephen Furst for the plaintiffs.

the plans had been deposited the local authority intimated that the suggested drainage design seemed satisfactory but formal approval was not given until February 1973.

The architects had on site, do that which they ought to have done anyway? The answer was appointed to inspect the work on site for the local authority had no professional qualifications but long experience in the building trade.

owed them a duty to require them to do that which they ought to have anyway? The answer was the support the work on site for the local authority had no professional qualifications but long experience in the building trade.

cxperience in the busing trade.

The two men decided that the drains should be constructed in the traditional way and not in the way set out in the plans. The contractors were so instructed and the drainage system was constructed in the traditional, unsuitable way. The drainage inspector had no authority to be a certal to that decision. o be a party to that decision.

inspector, again with no pro-fessional qualifications, carried out inspections and in May 1973 he asked the contractors' agent for information about the construction

He was given the information in a letter dated May 4, and it was when considering whether a duty of admitted that on reading this letter care to that owner was negatived to be should have appreciated that the contractors were constructing a owner had acted unlawfully. drainage system different from the approved design But he let them so approved design. But he let them go

revealed that a substantial number of them had failed. As a result the or them had raised. As a result interpretable system had to be reconstructed and the development was delayed for about three years. The plaintiffs started proceedings against the contractors, the architects and the local authority claiming to be reimbursed by one or other or all of them, for the losses they had them for the losses they had

The judge's findings, if right in 10 far as they affected the local authority, meant that they were liable to indemnify the plaintiffs against a substantial part of a huge claim made against them by the contractors.

The plaintiffs alleged that the local authority owed them a duty under Schedule 9 to the London made pursuant to the Act, tost Schedule 9, imposed on the plaintiffs a duty to ensure that the drainage works which they were proposing to construct and which their contractors did construct were suitable for draining the houses to

the local authority a duty to ensure first that the plans of houses and buildings intended to be exected provided for satisfactory drains and second that suitable drains were constructed in accordance with those plans.

LORD JUSTICE LAWTON said that in 1972 the plaintiffs decided to build 245 houses on a hillside site known as Knight's Hill. Lambeth. They engaged the first defendants to do the building work and a firm of architects.

The architects designed a flexible drainage system which would allow for subsoil movements. Soon after the plans had been deposited the local authority was that they had focal authority intimated that the manner specified in the statute and the bye-laws. The only relevant allegation of breach of duty against the local authority was that they had for subsoil movements. Soon after the plans had been deposited the comply with the statutory require-

That being so, could the plaintiffs rightly claim that the local authority owed them a duty to require them to

It might be that if the drainage-system had not been put right, an occupier of the houses when completed who suffered many to

raditional, unsuitable way. The rainage inspector had no authority to be a party to that decision.

Another local authority drainage and so caused themselves harm.

contractors, then abandoned that system and unlawfully installed an

Lord Justice Slade delivered a on constructing the drains in a way concurring judgment. doomed to failure.

Solicitors: Barlow Lyde & In 1976 testing of the drains Gilbert; Bridges Sawtell & Adams.

### IRA fear traitor wrecked kidnap

Part 14. 14. 24.

Provisional IRA was stepped up last night for a new kind of supergrass, the man who sab-olaged the start of a big fundraising campaign.

The failure of an IRA gang to kidnap Mr Gaien Weston, the stores millionaire, at his co Wicklow home in the Irish Republic on Sunday has amounted to the biggest blow against Provo morale for many

And the near certainty that a police Special Task Force unit was lying in wait for the raiders because of a tip-off has incensed leaders of the movement. Top priority has been given to inding the informer.

There was speculation in Dublin, too, that police intelli-gence could have come from a provisional who did not agree with an IRA plan to end a generally-observed, long-standing rule prohibiting kidnapping in the republic for non-political motives

The incident on Sunday was thought to have highlighted the IRA's desperate need for funds.

Special Branch police officers in Dublin are thought to have been anticipating an IRA fund-raising effort to buy arms for sometime after reports that the IRA was running short of money. Security chiefs have now reviewed the protection tactics for leading business figures in Ireland.

It was claimed that the police left a decoy car outside the house on Sunday, to lure the gang into their trap.

An existing regular but discreet watch on the homes of potential targets will be inten-

One reason for the IRA's current lack of money has been the striking success of the Special Task Force in stemming hig bank and payroll raids in the past few years.

Four men in Dublin hospitals

with gunshot wounds were last night reported to be from Northern Ireland, although they had lived in Dublin for some

The hunt continued yesterday for two men involved in the incident on Sunday.

At the special criminal Court today Nicholas Keogh, aged 27, of Cabra, Dublin, was charged with having a firearm with intent to endanger life and of using a firearm to resist arrest at Roundwood Park, co Wicklow.

Age versus youth: Before the start of the British Chess Championships in Southport, Merseyside, yesterday, Mr Dan Southcott, aged 93, the oldest player, practises against Sebastian Sinclair, aged six, the youngest.

# War games begin in Reagan's back yard

Washington

Big Pine II, the huge United States show-piece military exer-cise in central America began officially yesterday amid all the poverty, the rolling green ridges. haciendas and sleepy villages of

the poorest nation in the region. Honduras, long dominated by the US and always chronically misgoverned, is the ultimate banana republic.

In May, President Roberto Suazo Cordova, ill from a recent heart attack but back working in the castle that serves as presidential palace in the fly-blown village of Tegucigalpa -the capital - told his US allies into Nicaragua, to the south. Thus it was that Big Pine II -

President Suazo chose the name ing Nicaragua and its ally, Cuba. There are those in February during 10 days of Washington who believe that exercises code named Big Pine I plans for an imminent invasion because of the show of US Miskito indians.

For 10 days in May, accord-

vehicles, artillery pieces and about 100 field kitchens flowed into Nicaragua, mainly through the western port of Corinto.

That implied to the Hondurans and the Americans that Nicaragua's considerable military strength - the biggest in the region - was being endowed with instant mobility.

Simultaneously, according to reports emanating from the primitive border region, where malaria is endemic and the Indians are lucky to have a fortieth birthday, Soviet tanks and artillery were positioned for a capability to stab into Honduras. The provincial that Russian arms were pouring south-western town of Choluteca looked a possible first

The Americans had their - was authorized with the initial experience of the incom-essential purpose of intimidat- petence and inexperience of the petence and inexperience of the Honduran armed forces in - or, more precisely, Ahuas of Honduras have been aborted Tara L from the language of the The Hondurans have no

armour to speak of. There are ing to General Paul Gorman, 13 Scorpion armoured cars in commander of the Panama- Choluteca, no match for the based US Southern Command, T55 tanks the Nicaraguans use.

more munificent in recent times, Honduras was armed solely with mortars; mere bombs and arrows against the 122mm Soviet Howitzers south

The Honduran armed forces total 17,000, with no effective of military hardware. reserve system. In Nicaragua, there are 25,000 regulars supported by a reserve or militia system encompassing at least 61,000 more.

After President Suazo cried 
"help" in May, the US military 
brought forward its plans for

of the border.

The White House was behind that decision. The Administration insists that they are not the largest - though it is close -

From Christopher Thomas, a sizable number of armoured Before the Americans became Central or Latin America, but certainly they are the longest.
The exercises will last until
February and involve 19 ships,

13,500 or more naval men and

officers, up to 5,000 military personnel on the ground in Honduras and sizeable amounts Having raised alarm bells about another Vietnam, President Reagan and his Central America team have been bom-

barding the newspaper columns and television screens in recent weeks with speeches and statements describing the military manocurres as a security

Nicaragua was not going to be invaded. US troops would disengage from any act of aggression, there would be no quarantine of Nicaraguan ports itself an act of war. The sole aim, it has been said incessantly, is to create a status quo, an atmosphere of security, in order to make peace talks

The arrival of the American advance team in Honduras yesterday officially signalled the beginning of that process. The men will operate in three main areas fro north to south, but are under orders not to go within sight of the Nicaraguan border.

### SDP has no 'open door' for defectors

Continued from page 1

for the present Parliament, there has been pressure from many local activists in both parties for an even closer relationship and some of them have called for an immediate

Mr Wrigglesworth said yes-terday that both parties should discuss the issue over a period before taking a decision. "My strong view is that we should not be rushed into it - nor should we be actively resisting

The two parties, meanwhile, have agreed to fight the European Assembly elections and all by-elections before the next general election as an Alliance. The two chief whips have established a speedy coordination process to be activated immediately a by-election is called. Usually when a vacancy occurs the seat would be fought by the party which contested it at the general election, but there may be some adjustments.

### 1,500 Libyans besiege Chad town, says US

Continued from page.1 bombers which carried out

daily raids on Faya-Largeau. Major Abdul-Salem Muhammed Charledio, aged 40, said he bailed out after his

own aircraft was brought down by a Sam7 missile on Friday and was captured by Government troops the following day. He was presented to foreign

reporters and members of the Diplommatic Corps in Ndjamena yesterday and said his squadron of SU22s was based on the Aouzou Strip, a territory which Libya annexed from Chad 10 years ago. • WASHINGTON:

State Department yesterday described the situation in Faya-Largeau as serious and said that it was beseiged by between 1,500 and 2,000 Libyan troops and Libyan-supported rebels (Mohsin Ali writes). PARIS: M Claude Cheysson,

French Minister for External Relations, said yesterday that the latest American moves in the Chad crisis were "definitely not made after consultation with France", (Roger Beard-

### Letter from Bethlehem

# Puddles and politics defile holy shrine

Bethlehem's Manger Square, originally built by the Emperor Constantine in AD 330 is widely reputed to be the most ancient Christian shrine still regularly used for wor-ship. It is the centre of a complex, bitter and apparently intractable dispute between the three different denominations which claim rights to the sacred property. It is also probably the wettest and least well-maintained in the Holy

It is no secret that the tens of thousands of pilgrims who flock to this Israeli-occupied Arab town every Christmas have to wade uncomfortably through deep puddles inside the church, and that many worshippers sit with rain dripping on their heads while the winter winds whistle through the surrounding Judean hills.

Apart from the comfort of those drawn to the spot where tradition has it that Jesus was born, the future of a number of invaluable twelfth-century mosaics is also now at risk.

Although the problem is not a new one (a British survey conducted in 1935 during the Palestine mandate concluded that repairs to the structure of the church were "urgent"), it has recently reached crisis proportions, with engineering experts predicting that the whole future of the building is at stake if the three-month job to replace the rotten roof is not commenced soon - preferably before the next rainy

season begins in November. The Israeli Military Government (or civil administration as it prefers to call itself these days, although it is headed by a military officer with the rank of brigadier general) has emerged from the bizarre dispute with full credit as a fair-minded arbiter. Its £90,000 offer to do the work was flatly turned down be-cause of the intransigence of the Greek Orthodox Church, the denomination with by far the biggest stake in the shrine.

For centuries, the Greeks have disputed ownership of the site with the Catholics and the Armenians, with the peace - quite literally - only being maintained by strict adherence to an arcane code of conduct always referred to simply as the status quo. which was laid down in the eighteenth century: an attempt to breach this frustratingly imprecise set of rules later

The Church of the Nativity on emerged as one of the causes of the Crimean War. Although the code covers

virtually everything down to whose right it is to dust the star above the altar, it unfortunately says nothing about rights to repair the roof
- which has never been in good shape since the seven teenth century when the lead originally supplied in 1482 by the English king. Edward IV, was removed by the Turks to manufacture bullets.

As things stand today, the Armenians and Catholics have decreed that the repair work (which all parties agree is vital) can be done by the Israelis without prejudice to any future ruling on rights inside the building. But the Greeks insist that they have the sole right to pay for and carry out the work, a demand which the other two denomi-

nations reject out of hand.
"Frankly, we are in a
dilemma of the most delicate nature", an Israeli official explained doing his best to remain tactful. "We can hardly go in and effect repairs

Apart from aesthetic con-siderations, the Israelis are also concerned that they continually receive the blame for the manifestations of grave neglect that are obvious to any visitor who enters the church after the onset of winter. They have tried repeatedly to get the three churches round the table, but so far these effons

Recenly the Greek Metro-politian Bassilios insisted again that historically the shrine belonged to his denomination alone. "We have been there since the time of Constantine", he argued, "The others came centuries later".

A letter to the Israeli civil administration from Patriarch Diodoros I, the influential head of the Greek Orthodox Church in the Holy Land thanked the occupiers for offering to pay for the repairs, but insisted on the right of his own church to do so. All subsequent efforts by

Israel's Ministry of Religious Affairs to persuade the Greek churchmen to see reason and accept the suggested compro-mise have failed. "The situ-ation is intolerable", explained an official from the ministry. "I should not really say this m but the whole affair seem very unchristian".

Christopher Walker

junctions 30 and 31 near Sheffield: restricted access to motorway at times. M6: Lane closures at Scotswood Bridge, Gateshead, Tyne nd: A85: Lanc closures W Scotland: A85: Lane of Inchture, Perthshire.

### The papers

The Washington Post said esterday that to accept that Colonel Gaddifi is a menace is not to agree that the US should be leading the fight against him. France has been slow to act on what many Africans sow to act on what many Arricans accept as the traditional French responsibility in Chad, but that country is "not familiar, let alone vital. American turf", the paper

nore blame for the killings there than the Irish-American community which finances the violence from the safety of its bars in New York', says the Daily Mirror. Praise for the "courage and daring of the IRA" is an abuse of the language, the pape The Daily Express also criticizes

the attitude of the American supporters of the IRA. "Now that they have seen how the IRA, with American help, is provoking bloodshed and mayhem in the province, will Noraid drop their support? No. (because) they did not support? No. (because) they did not come to Ireland to find out the facts, merely to confirm their prejudices".

### Pollen forecast

3 to 6 pm

### Weather forecast

An anticyclone will persist near Scotland, while a trough of low pressure approaches the English Channel.

### 6 am to midnight
